

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

PREFACE

RECOGNIZING the growing interest which is being manifested in library work and the consequent increasing demand for information regarding purely technical appliances, the Library Bureau has issued a separate catalog of its library department designed to interest those establishing public libraries, those actively engaged in library work, and owners of private libraries seeking for the best aids in making their libraries easy of reference and generally more serviceable. Much which has appeared in former catalogs of interest to business houses but not to library workers has been eliminated.

The new publications to which we call attention will be found of especial interest; and all mechanical and labor-saving devices we believe are the best of their kind yet devised.

Goods will be shipped to any house, institution, or individual of known responsibility, or on receipt of satisfactory references. As our constituency is scattered over the entire civilized world, it is necessary to adhere strictly to the rule, for goods can not be sent to strangers. Patrons who have no means of showing their responsibility, may order C. O. D., or remit in advance to cover the bill, and any surplus will be returned with the goods shipped. Remittances should be made in exchange on Boston, New York, Chicago, or for foreign orders, on London, or by money order or postal note. Actual cost for collecting local checks will be charged.

Always give catalog number and date of catalog used, as printed on its title, to facilitate the prompt and exact filling of orders.

All prices printed in this catalog are net. The discounts for quantity are indicated in each case and subject to change.

The simplified spellings used, are recommended for general adoption by the most eminent English scholars now living.

To public and private libraries

Up to 1876 no business had been organized with the definite purpose of supplying libraries with all needed appliances for administration, or in any way to consider their wants, aside from the attention, based on immediate profits, which they might receive from more or less enterprising booksellers and stationers. This was all the field seemed to justify from a business point of view. Few libraries used the same standards, or accomplished a given result by the same method. This diversity of practice made co-operation well nigh impossible among older libraries, and compelled those just starting to select from existing methods or to originate new ones with inexperience for guidance, each library administration representing the judgment and personal equation of its promoters.

In 1876 the American Library Association was formed for the purpose of focalizing the experience of its members, to discuss and recommend the best methods and devices for administration. Its work is well known and far reaching.

Leading members of the Association have given their time and services in a most generous way to the solution of important questions. A co-operation committee was formed at the start for the purpose of gathering models and suggestions of new devices and working out for each necessity the very best method or appliance. In this way the essential appliances now used by libraries in America were evolved, though now greatly improved by the years of study given them by the Bureau. It soon became apparent that but a small part of the difficulties were overcome by this co-operative selection; that some one must undertake the supply of the articles recommended, not only to save the excessive cost and great extra trouble and loss of time of each library making separately, but to give constant study to perfecting every detail and to reduction of prices where practicable. To the ordinary business mind the idea that a self supporting business could be developed in this field seemed utopian; there seemed no "thoroughfare" for him who should invest capital, or what is of greater value, time, in such a venture.

But the indefatigable secretary of the associated librarians felt that such a business would be absolutely essential to the proper development of a new library movement, and so personally assumed the risk of manufacturing and carrying in stock all supplies, not obtainable elsewhere, recommended by this committee, carrying on the work for years not only without compensation, but at actual loss to himself. From this small beginning came the Library Bureau.

Gradually was laid the foundation of an organization that has been the most active and important agency in furthering the work of

the Association, rendering guidance and assistance to every library asking it, by its labors and liberal expenditures, where no one else was willing to invest, till careful observers have been forced to give credit for much of the modern library progress to the activities set in motion and kept at work by the Library Bureau.

On this foundation the Bureau of to-day, with its several departments thoroughly organized and presided over by experts, has been built up. It has its offices and salesrooms in Boston, New York, Philadelphia, Washington, D.C., Chicago, St. Louis, London, and Paris, and a score of trained representatives visiting libraries and the growing commercial constituency.

Consultation department. To give expert advice as to developing interest, raising funds, location, building, fixtures, heating, lighting, ventilation, care, selecting and buying books, binding, cataloging, indexing, classification, circulation, rules, help, and all the details of organization and administration, so as to secure the best results at the lowest cost, profiting by the experiments and experience of the rest of the library world.

Furniture department. To take the library building from the general contractor, its exterior complete, its interior walls and floors and partitions done, and equip it with all other fixed and movable furniture of iron or steel or wood, including the stack department and stack floors complete.

Publication department. To publish manuals for administration, indexes, and tables of classification, subject headings for shelves and catalogs, guides, labels, and various needed helps, practicable *only* through a co-operative agency.

Supplies department. To furnish, of better models, materials, and workmanship, at less cost than otherwise obtainable, all articles recommended by the Library Association and Library School, and to equip libraries, from smallest to largest, with the best known devices for cheap, convenient, and efficient use and administration. It is its purpose to supply the best for each use, and, if selection is left to the Bureau, the benefit of its unequalled experience and facilities is secured.

Except books and periodicals, these supplies include *everything needed* in the best equipped public or private library, covering the whole field as if there were no other source of supplies.

Many away from large cities, or not knowing where to go, or what prices to pay, waste much time in getting an unsatisfactory article, and often pay more than the best would cost, if bought with our facilities. To accommodate libraries and librarians, we allow anything wanted to be ordered through us, the cost never being more (it is often less) than if bought directly.

The Bureau aims to make itself indispensable to the libraries, and to prove to them by experience that the most convenient, cheap, and satisfactory course when anything is wanted is to come or write at once to it.

Catalog department. Many libraries, as a result of increased knowledge among library trustees of better library methods and the enhanced usefulness of a library properly classified and cataloged, are reorganizing and bringing their administration in accord with advanced library thought. The Bureau undertakes contracts for organizing new libraries or reorganizing old ones, in accordance with the latest developments of library science, taking full charge of such work, or it will send from its corps of experts those thoroughly competent to act in the employ of the trustees.

11a. Reading for the Young and Supplement.—A classified and annotated catalog, with an alfabetic index of authors, by John F. Sargent. Prepared by Mary E. and Abby L. Sargent. 1 vol. 8vo, 225 pp.

Published by the Library Bureau, under the direction of the American Library Association, Publishing Section. It presents a select list of books suitable for young people, not confined to those usually known as "juveniles," but taking a wide range in general literature. The titles are arranged under subject-headings covering all departments of reading and are accompanied by descriptive notes, intended to show the character and value of each book; under each heading the book-titles are followed by references to the best articles on the subject in the leading young folks' periodicals, making a very full exhibit of accessible sources of information for young people on all subjects. The author-index at the end indicates at once where any particular book is placed in the classification.

Librarians and teachers will find this book of great service in guiding the reading of the young; many public libraries will distribute it to their young readers, and it will be supplied in quantities at very low rates.

The attention of parents who wish to direct the reading of their children is called to this book as an invaluable aid. What better present for a child with a taste for reading than this?

To booksellers this work, with its liberal wholesale terms, offers an opportunity, not only to make a fair profit, but to lay the foundations for future trade by educating customers and stimulating the demand for good books.

The Supplement has recently been issued. The list is classified and annotated, like the original Reading for the Young, with A—Z index of authors, also a subject-index to both volumes which includes references to periodical literature.

The price of Reading for the Young and Supplement bound together, cloth boards, is \$1.50.

The price of Supplement (single copies) is as follows:—

paper covers	\$.75
cloth boards	1.00

On five or more copies of the Supplement the following discounts are offered:—5 copies, 15 per cent; 25 copies, 25 per cent; 100 or more copies, special rates.

A limited number of copies of the original work as issued in 1890 (121 pp.) remaining on hand, they will be sold at reduced prices as follows: in paper, 25c; in cloth, 50c; full flexible Persian morocco, \$1.00. Address all orders to Library Bureau.

Roberts, A. W. Growing walking canes. *Harper's Young People* 5: 539. ('84)

Sage, Agnes C. Nuts. *Harper's Young People* 6: 786. ('85)

DOMESTIC ECONOMY.

Girl's room, A. (a)

Teaches agreeable ways of making rooms and homes pretty with little expense; how to darn, mend, etc.

Goodwin, Christina. How they learned housework. (a)

Four young girls' first efforts in sweeping, dusting, plain and fancy cooking.

Kirkland, Mrs. E. S. Dora's housekeeping. (a)
A young girl's experience in housekeeping, while her mother is away to regain her health.

— Six little cooks. (lb)

Some little girls amuse themselves by learning to cook, and afterward give an entertainment to prove their success.

Lothrop, Harriet M. (*Margaret Sidney*.) New departure for girls. (a)

How two young girls without accomplishments, when left penniless, turn a gift at darning to account; gives excellent advice to girls.

Owen, Catherine. Gentle breadwinners. (a)

Directions in story form for making candy and cake for sale.

Power, Mrs. S. D. Anna Maria's housekeeping. (a)

Experiences in beginning housekeeping, pointing out mistakes and suggesting remedies.

Pratt, Ella [Farman]. Cooking club of Tu-whit Hollow. (ab)

Whitney, Adeline D. T. Just how. (a)

Reliable receipts in all departments of cooking, with other valuable elementary knowledge not generally in cook books.

Aunt Marjorie Precept. Fine art of cooking. *Harper's Young People* 3: 360. ('82)

Cooking clubs. *Harper's Young People* 2: 589. ('81)

Herrick, Christina T. Employments for girls. *Harper's Young People* 9: 17. ('88)

— What boys and girls should wear. *Harper's Young People* 9: 487. ('88)

Huntington, Emily. Kitchen garden school. *Harper's Young People* 9: 269. ('88)

Kirkwood, Louise J. Kitchen garden school. *St. Nicholas* 10: 928. ('83)

Lillie, Lucy C. Pot-pourris. *Harper's Young People* 10: 548. ('80)

White, Sallie Joy. Bread-making. *Wide Awake* 29: 137 [sup.]. ('89)

— Cooking in the public schools. [Boston] *Wide Awake* 28: 9-89 [sup.], 29: 105-137 [sup.]. ('89)

TRANSPORTATION AND COMMUNICATION.

Allen, G. G. Universal phonography. (a)

Dolbear, A. E. The telephone. (a)

An account of the phenomena of electricity, magnetism,

and sound, as involved in its action; with directions for making a speaking telephone.

Jones, R. J. Cornewall. Ships, sailors, and the sea. (a)

Book of reference on different kinds of vessels, light-houses, signals, lightships, flags, etc.

Bunnell, J. S. Cable cars. *St. Nicholas* 6: 7. ('79)

Camp, Eugene M. Telegraphy as a profession. *Harper's Young People* 9: 806. ('88)

Flint, Jas. H. Cabling. *St. Nicholas* 11: 388. ('74)

Henderson, W. J. Compass bearings. *Harper's Young People* 10: 631. ('89)

— Danger angles. *Harp. Young People* 10: 699. ('89)

Lewecs, J. The boys' own phonograph. *St. Nicholas* 7: 235. ('80)

Linn, W. A. Telegraph boys. *St. Nicholas* 7: 151. ('80)

Rideing, W. H. Atlantic cable. *St. Nick.* 5: 327. ('78)

— Life saving on the coast. *St. Nick.* 11: 336. ('74)

Traverse, Major. The pilot boat. *St. Nick.* 2: 351. ('75)

— The pony express. *St. Nicholas* 11: 641. ('74)

— Railroads. *St. Nicholas* 3: 81. ('76)

MANUFACTURES AND TRADES.

Boy's workshop, A. (ab)

Instructions for furnishing a work shop, use of tools, making useful and ornamental articles, how to photograph, etc.

Griffith, Rob. Boys' useful pastimes. (ab)

Use and care of tools, instructions for making toys, household ornaments, scientific appliances.

How to use wood-working tools. (a)

A manual of instruction.

Kirby, Mary and E. Aunt Martha's corner cupboard. (b)

How China dishes are made; where various articles in a cupboard come from and are prepared.

Lukin, J. Amongst machines. (a)

Describes mechanical appliances, glass-making; how pins, screws, bolts, and other things are made.

Manson, George J. Ready for business; or, choosing an occupation; practical papers for boys. (a)

Considers opportunities afforded by different trades and professions; what is necessary in order to acquire a knowledge of them, etc.

Same. *St. Nicholas* 13: 212-300 ('86), 14: 627-947 ('87)

Sauzay, A. Wonders of glass-making. (a)

History of glass-making; how mirrors, bottles, thermometers, optical glasses, etc., are made.

Uncle Lawrence. Young folks' queries. (b)

In story form, tells about the manufacture of pins, needles, candles, matches, etc.

Vance, F. T., and others. Ways for boys to make and do things. (ab)

How to make kites, tents, menageries, boats, and snowshoes; instructions for walking, skating, tree culture, etc.

Amateur's workshop. *Harp. Young People* 9: 167. ('88)

Bolton, C. E. Paper. *St. Nicholas* 11: 808. ('84)

11b. List of books for girls and women and their clubs, with descriptive and critical notes and a list of periodicals, and hints for girls' and women's clubs; edited by Augusta H. Leypoldt and George Iles. Published for the American Library Association by the Library Bureau, Boston, 1895. 7 + 161 p. Q.

The list tells of some 2100 books worthy to be read. Men and women who know have chosen the books and said about them just what they would tell an inquirer face to face.

Among the contributions are:

Fiction, by a Reviewer for the "Nation"; History, by Reuben G. Thwaites, Secretary State Historical Society of Wisconsin; Poetry, Essays and Criticism, by G. Mercer Adam, author of "A Précis of English History"; Fine Art, by Russell Sturgis, President Fine Art Federation, New York; Music, by Henry E. Krehbiel, Musical Editor, "New York Tribune"; Education as a Science and an Art, by Prof. Edward R. Shaw, New York University; Natural History, by Olive Thorne Miller, author of "Bird Ways"; Country Occupations, by L. H. Bailey, Professor of Horticulture, Agricultural College, Cornell University; Useful Arts and Livelihoods, by Augusta H. Leypoldt. Editor "Literary News", New York; Works of Reference, by Helen Kendrick Johnson, Editor "American Woman's Journal", New York.

Price, cloth, \$1.00; paper, 50 cents.

Discounts: 5 copies to one address, 10 per cent.; 10 copies, 15 per cent.; 25 copies, 25 per cent.; 50 copies, 40 per cent. The same in 5 parts, smaller size, 10 cents each.

Printed Catalog Cards. The printing of catalog cards of current publications was undertaken by the Library Bureau three years ago. This work, which the Bureau's interest rendered possible, has, in spite of many obstacles, been successfully carried on, and its continuance is now assured. For many reasons it has seemed to those most closely connected with this work that it should be conducted under the direct supervision of the American Library Association. The Bureau cheerfully acquiesced in this arrangement, offering to the Association their facilities for the manufacture, printing and distribution of the cards. In the future, this work will be carried on by the Publishing Section of the American Library Association, and the cards being manufactured and printed by the Bureau will be of the same quality and accuracy of finish as those previously supplied.

Plan. Publishers are furnishing advance copies of their books. These are being cataloged by expert catalogers, cards printed, and distributed promptly to all subscribers. The cards are issued twice a week and cover the cataloging of all current standard books. Catalog entries are full and complete for all library uses. They answer the questions of the book-seller as to the character of the books, and serve the publisher by being advance announcements.

For libraries, these cards are a catalog of all purchases of current books; the cards for books not purchased, make an alphabetic purchasing list or can be used as supplements to the printed subject bibliographies.

For booksellers and publishers the cards become a complete alphabetic catalog of all standard American books from Nov. 1, 1893.

Cost. No very accurate estimate can be made, as the number of books to be issued during the year is uncertain. Nor is it possible to base the charge on so much per title, as some books may be cataloged with two cards and others with half a dozen. Subscriptions are taken for the year at so much per thousand cards issued, including postage, as follows:—

Printed on L. B. standard 33l cards, per 1,000	. . .	\$7.50
“ “ “ 33r “ “	. . .	9.00
“ “ “ 33x “ “	. . .	10.50

The difference in price is due to the difference in the weight or thickness of the cards, and the added cost of distributing the thicker cards.

The cards can be furnished by special order of any desired size to fit catalogs already started. We cannot recommend too strongly, however, the adoption of the almost universally used 33 size, 7³ x 12⁵ cm. (3 x 5 in. approximately) which has been proved most desirable. At the bottom of the card are printed the Decimal Classification and Expansive Classification class numbers, Cutter author numbers, subject headings for which cards have been printed, and the first word of any added entry. Unless advised to the contrary, standard 33l cards will be sent to all subscribers.

The following cards show the general style of subject and author entries :

Adams, Herbert Baxter,

Life and writings of Jared Sparks ; comprising selections from his journals and correspondence

Boston *Houghton, Mifflin & co.* 1893. 2v. portraits, O. cl. \$5.

Call number

Aldrich, Thomas Bailey

Two bites at a cherry, with other tales

Boston *Houghton, Mifflin & co.* 1894 [c. 1893] 4+269 p. D. cl. \$1.25

Contents. Two bites at a cherry — For bravery on the field of battle — The Chevalier de Ressequier — Goliath — My cousin the colonel — A Christmas fantasy, with a moral — Her dying words

A12 Two

Model Lists. A few sets of cards issued from the beginning can be supplied by the Bureau at special prices. These lists besides serving all the purposes of the current lists when arranged and guided by us serve to the new library or the inexperienced librarian as a model by which the card catalog, sure to be purchased, can be made.

12. Decimal Classification and Relativ Index. For arranging, cataloging, and indexing public and private libraries, and for pamphlets, clippings, notes, scrap books, index rerums, etc. By Melvil Dewey, Director New York State Library and Library School; Ex-Pres. American Library Association. Published by the Library Bureau.

Adopted by the *Institut internationale bibliographique*, September, 1895, as its official classification for use in the various countries and now being translated into the leading European languages.

Brief description. All known subjects are grouped into 10 classes numbered with the digits, 0-9; e. g. 5 is Science. Each class is treated as a separate library and divided into ten divisions numbered likewise; e. g. 51 is Mathematics. Each division has ten sections; e. g. 513 is Geometry. Many of these sections are further divided so that the minutest topic may have a specific number, all after the first three figures being arranged as decimals. Thus 331.89 is Strikes, or to give the meaning of each figure in order (as would be seen at a glance in the book)—Sociology; Political Economy; Capital, Labor, and Wages; Laboring Classes; Strikes. All subjects in the tables are arranged in simple arithmetical order, and the alfabetic Index enables a novice to assign the minutest topic to its exact place in the classification or to find readily anything previously assigned by the quickest and cheapest method yet discovered. Full directions are given for applying this system to its manifold uses and also for variations to meet special cases.

This scheme, first printed in 1876 in 40 pages, had 1000 heads in the Tables and the largest Subject Index then printed. The latest edition has many subjects divided a hundredfold more minutely; the Index has 20,000 headings. Ample space is given for ms. notes in the tables. It is equally adapted to the largest public or smallest private collection, to books, on shelves, pamphlets in cases, clippings in scrap books, cards in catalogs, notes in boxes and trays, etc. Wherever compared for economy and ease of adoption and use, it is chosen above all others. No person interested in libraries can afford not to investigate this system now adopted more widely than any half dozen others.

Price postpaid. Fifth edition, 1894. Half turkey, gilt top, A. L. A. binding, \$5.00. Full flexible Persian morocco, red edges, \$5.00.

12a. Abridged Decimal Classification and Relativ Index is made in answer to a demand for a shorter form for small and slowly growing libraries. These short (three figure) forms can be changed to the full class numbers at any time without other alteration than adding extra figures from the unabridged tables.

Price postpaid. Cloth, \$1.50.

13a. Card Catalog Rules. Library School Rules for author and classed catalogs, with 52 fac-similes of sample cards, 5th edition (1894), edited by Melvil Dewey, Director of New York State Library and Library School, ex-President American Library Association, with bibliography of catalog rules by Mary Salome Cutler, instructor in cataloging in the Library School. Published by Library Bureau.

These rules were very carefully made up from the A. L. A. Code seven years ago. Since then they have been in daily use in the Columbia Library training classes, and the 5 years in the Library School. For over 3 years they have been in type, subject to constant criticism and suggestion from those needing their help, and hundreds of minor changes in wording and illustration have been made in the effort to make them as perfectly as possible an invaluable guide to catalogers.

The graphic illustrations form the most important feature. Fifty-two fac-simile cards were found necessary to fully illustrate all the points. These include all details: the names, titles, imprint, capitals, spacing, indentation, reference and call numbers. They are printed twice in order to show the red down lines in proper position, and blue ink is indicated by special type. Beside these it has such marginal explanations, amplifications and variations from previous rules, as have good authority; variations being printed in italics, the others in roman types. Nothing so complete has been made before.

Library School Accession Rules. [See 31a.] The basis of these rules was first written by the Sec. of the A. L. A. for *Library Journal*, vol. 1, p. 315, with the description of the Standard Accession Book, which was (1877) adopted by the Coöperation Committee of the A. L. A. They were later revised and used in the preface to this Accession Book. They are now reprinted with additions, and such modifications as use has proved wise, and the frequent adoption of the Condensed Accession Book made necessary. A sample page, written in the library hand, illustrates every rule, and is invaluable to the cataloger. Price in pamphlet form, 50c.

Library School Shelf List Rules. [See 31i.] The outgrowth of 15 years' use of the L. B. shelf sheets, and of 8 years' experience in teaching shelf listing in the School, they cover the constant questions that arise, and are fully illustrated by sample pages, showing method of filling out both, the 20 x 25 cm, and the newer, 10 x 25 cm forms. Uniform with Card Catalog and Accession Rules, pamphlet form, 25c.

All are printed on finest paper 25 x 17.⁵ cm, allowing margin for side notes. The regular edition for the use of catalogers is interleaved with linen paper to admit of individual additions.

Card Rules, Accession Rules, and Shelf List Rules, bound together, postpaid, in paper covers, \$1.00; in cloth, \$1.25; in ½ genuine turkey morocco, \$2.00; in full flexible persian morocco, interleaved, cataloger's edition, \$2.50.

13b. Cutter's Decimal author table. A scheme giving to each work its own exclusive book number, so contrived that the books stand on the shelves alfabeted by authors under each subject. With the relative location, now so largely adopted by libraries, this system makes indefinite intercalation of books possible in a very simple manner. It not only brings all of an author's works upon one subject together upon the shelves, but allows of arranging still closer by dates or by alfabeting under title, as desired. Devised by C. A. Cutter, Librarian of the Forbes Library, Northampton, it has grown from its use in one library to a wide adoption in others, as a satisfactory solution of one of the problems of close classification. Full explanatory circular mailed on application. The Tables are mounted on boards, strongly hinged together, and fold into compact form. Price, postpaid, mounted, \$1.25.

13c. Cutter's alfabetic order table. Made by Miss Kate E. Sanborn on the same principle as 13b, but 3 figures instead of 2 are used with the initial letter. It is intended for libraries that have large classes to be arranged in alfabetic order. 2 vols. Price, postpaid, \$2.50. Sold separately, — vowels and S. \$1.00; Consonants, except S. \$1.50.

131. List of subject headings for use in dictionary catalogs, prepared by a committee of the American Library Association. Published for the A. L. A. Publishing Section by the Library Bureau, 1895. 5 + 188 p. Q.

There has been nothing more puzzling to the novice in cataloging than the variations of subject headings in the various catalogs. This List of subject headings furnishes a professional tool which has been much needed. The headings used in the best dictionary catalogs have been carefully compared and the headings considered preferable have been adopted by the committee for this list. Price, cloth, \$2.00.

13e. Eclectic card catalog rules. Author and title entries based on Dziatzko's "Instruction" compared with the rules of the British Museum, Cutter, Dewey, Perkins, and other authorities; with appendix containing a list of Oriental titles of honor and occupations; by Klas August Linderfelt, ex-Librarian of the Milwaukee Public Library. Boston, Charles A. Cutter, 1890. 8 + 104 p. O.

"Prof. Dziatzko's work," says Mr. Linderfelt, "is a marvel of ingenious condensation, lucidity, and completeness. It would have been impossible to evolve out of mere theoretical reasoning such an array of minute directions as to the manner of proceeding in the innumerable variations and peculiarities of book making, which are the result of the vagaries of authors, publishers, and printers of the last 450 years, and now contribute their share toward making the life of the conscientious

cataloger a burden. On the contrary, Prof. Dziatzko's rules are the outgrowth of the actual passing through his own hands of every one of 340,000 cards and the 330,000 books and pamphlets which they recorded; and the examples he cites are actual existing facts."

Taking this as a foundation, Mr. Linderfelt has prepared a manual suited to the needs and habits of the American cataloger, who, in many respects, has very different ideas from his German cousin, and has made it in a way an epitome of all rules by his references to other codifiers.

The publisher said at the Fabian House Conference:—

"Being unwilling that so much good work should be lost, I am printing it myself. It is not the foolish affection of a foster-father that makes me believe the book to be of the very highest importance to all catalogers. While I naturally hope it will not entirely supersede my own Rules, I see that it presents the subject under a very different aspect and in a new order. A cataloger who loves his profession, and wishes to broaden his views, will profit greatly by comparing the two treatises. Another thing: examples are always interesting. Herr Dziatzko's work was profuse in examples, and Mr. Linderfelt has supplied still more. Besides this, Mr. Linderfelt has added, in an appendix, a list of Oriental titles, with their translations,—something that is not to be found, so far as I know, anywhere else in literature."

The book is excellently printed and well indexed. Its price is:—

paper covers	\$1.25
cloth boards	1.50
half goat, A. L. A. style (very substantial)	2.00
flexible Persian morocco, interleaved	2.50

Orders may be addressed to LIBRARY BUREAU.

15a. Library Notes. A journal of improved methods in which is given a valuable record of the results of the studies and experiments conducted in the Library School, Albany, N.Y.

A feature of this work is "literary methods and labor-savers," devoted to practical, helpful rules, notes, and hints for every reader and writer who would accomplish the most possible with his time and strength.

Back volumes. Every one connected with or interested in library work, not possessing these handbooks, should secure them if possible. They are already very scarce. With the increasing number of new libraries that must have these volumes, they will soon be unobtainable.

Prices. Vol. 1, bound in cloth, \$2.50; in ½ turkey morocco, A. L. A. binding, \$3.00. Vols. 2 and 3 are paged and indexed as one volume. The 2 vols. bound into one book, in cloth, \$2.50; in ½ turkey morocco, \$3.00.

15b. Library Journal. The most important and economical investment for a library, new or old, is a set of the first five vols. of this official publication of the Library Associations of America and the United Kingdom.

The *Journal* was founded in 1876, at the Centennial, as a means of recording the results of the extended studies and experiments in all the best managed libraries, large and small, thruout the world. Committees of those librarians best fitted for the work, for the first five years worked faithfully collecting the results of experiment and experience, and from careful comparison recommended the best for the various uses of large and small libraries. Thus this set of books answers authoritatively a great portion of the thousands of questions that arise constantly in every library. It really contains more on these subjects than all the rest of the language together, and is simply indispensable in any library wishing the best and cheapest methods. Tho the cost has deterred some very poor libraries, a single suggestion has repeatedly saved directly many times their cost. The set comprises the best results of the labors for five years of the best living authorities on library subjects, who considered, not alone the questions which arose during that time, but for the purpose of aiding other libraries deliberately reviewed other questions likely to arise.

This indispensable work is out of print; and, as no plates were made and its extent and cost make reprinting impossible, it will soon be unobtainable. We have a few sets in perfect order, with indexes, titles, and plates, and offer the set of five vols., lacking No. 1 of vol. 2, for \$50.00 unbound. The best regular A. L. A. 1-2 Turkey morocco binding costs \$1.25 per vol. extra. As so many of the new libraries must have this set at some price, and the supply is so nearly exhausted, no better investment in books can be made than to buy and hold for the certain increase in price, to say nothing of the great service they will render an active library. We have some extra copies of vols. 4 and 5, which contain the most valuable matter in the set. These can be had separately at \$6.00 for vol. 4, and \$5.00 for vol. 5, till the extra copies are taken. Vols. 1, 2, and 3 will not be sold outside the set.

Vols. 6-19. These are hardly less valuable and necessary than the first five, and we recommend every live library, not now possessing them, to secure them next after getting the first five volumes, and then to subscribe for the current year.

Subscription to current volume, \$5.00. Subscribers receive with current issue the *Literary News* as a supplement, but not with back volumes.

15c. Public Libraries. The many letters of inquiry concerning small details and elementary principles of library work which the larger libraries receive from the smaller ones, brought to the notice of those interested in the advancement of libraries the need of a publication to give special attention to the more common details and trials of the small and new public libraries. The idea seemed to be spontaneous in many quarters that a magazine of this kind, at a price within the means of all, would be of great assistance to a large number of earnest inquirers.

PUBLIC LIBRARIES was started to meet this need. It deals with all phases of library work in a concise, simple way, such as gives the best aid to those who need it. There are also a large variety of items of news, such as encourage and inspire small libraries, as well as large, to put forth their best efforts to accomplish something of value to the library world.

The editors, keeping in mind the natural connection between schools and libraries, have made a special effort to collect items of interest to principals and teachers of public schools, as well as to those connected with university and college libraries.

PUBLIC LIBRARIES was designed to supplement rather than take the place of the Library Journal and other library publications. Its careful reports of matters of interest to members of the American Library Association and of the meetings of the various state associations and library clubs have recommended it to the attention of library workers everywhere :— while the attention given to the elementary, but no less important details of library work makes it suggestive to all and invaluable to less experienced workers.

Published monthly by Library Bureau, 125 Franklin St., Chicago, — subscription price \$1.00 a year. A few of the earlier numbers not having as yet been taken, subscriptions will be received to date from the first number, May, 1896.

21a. L. B. Book Truck. One of the most useful devices ever made for an active library. Will save its cost each year in books and time. The Truck is 100 cm (40 in.) long, 100 cm (40 in.) high, and 35 cm (14 in.) wide. The shelves hold two rows each, or six full shelves of books; i. e. nearly as much as an entire book-case. All these are in position to examine and handle while sitting,—a great gain when checking bills, cataloging, etc., as it saves bending over tables or repeated handlings.

The special LIBRARY BUREAU WHEELS made by us for these Trucks are very heavy, large, and covered with rubber, so that the entire load may be moved with the greatest ease and noiselessly. The peculiar adjustment of these wheels allows a rotary motion, so that the loaded Truck is a REVOLVING BOOK-CASE of the most convenient kind, and enables the Truck to follow narrow aisles and make sharp turns impossible to any other form; while the rubber shields on the sides make injuring of woodwork impossible. These various features make the Truck indispensable if once used.

The books when taken from the box or package are placed on the TRUCK, which is rolled from one desk or department to another, till

bills are checked, all the various records and catalogs written up, plates, labels, and numbers put in, etc., etc., and the books reach their permanent shelves. In all moving, cleaning, and re-arranging, the Trucks are in constant use, as well as in returning books to shelves from the Loan Desk. The books as returned are set on their proper Truck shelf; and when the Truck is filled a boy rolls it around the aisles and through the alcoves, and replaces the books, which in all this work stand on firm shelves uninjured, while without the Truck they are carried in armfuls, bindings are scratched and wrenched, threads broken, and the books seriously injured. For these heavy loads and constant use we find the very best material and workmanship none too good. The Trucks are of polished, quartered oak, strongly braced, the sides covered with rubber to protect from injuring furniture, and the wheels are fitted with great nicety and perfection, to secure easy, **noiseless** working and the ability to run the truck around corners and in narrow aisles.

21a. L. B. Book Truck, 4-inch heavy rubber wheels **\$25.00**

21b. Book Truck. Besides the standard L. B. above, we make one of a lower grade and of the same size, but fitted with smaller wheels, and not entirely noiseless. These are satisfactory in many cases, though not as well finished or as easy running. There is less rubber mounting, but sufficient to keep the truck from marring fine finish, with reasonable care. Made in ash only. Price . . . **\$15.00.**

21e. L. B. Book Tray. For the same purposes as the L. B. TRUCKS, but holding only one eighth as many books. Like the Trucks these are of polished, quartered oak with rubber mounting, to guard against noise or scratching of tables when set down. Handles at the end make them convenient for moving about, and broad, adjustable carrying straps with spring attachments allow the entire tray-load to be suspended from the shoulders, so that both hands are free for handling books. Care is taken in the construction to get the best size, balance, etc. These TRAYS are used wherever several books are to be carried about; e. g., a cataloger takes a half shelf of books on a Tray and sets it on her table. Each book is replaced as fast as cataloged, and the entire Tray-full is carried from one table or department to the next, and finally to the shelf again, saving the injury from careless handling. Like the L. B. BOOK TRUCK, the Tray saves much time, protects the books, and is of great convenience and utility. Those who have used them find them indispensable.

21e. L. B. Book Tray of polished, quartered oak, rubber mounted, complete with straps for carrying from the shoulders **\$4.50**

21f. Same, without straps **3.00**

Card Catalog

"It is hardly necessary in 1887 to say that every library **should** have a card catalog instead of any of the various clumsy substitutes, for its enormous advantages over the other systems have been **almost** universally acknowledged and it hardly seems credible that **any one** familiar with the library world would even raise the question **as to** whether the card catalog was the best form for the **official library** record by authors and subjects. . . . While there is wide **difference** of opinion as to the best form of catalog to supply to the **public**, **all** agree that an author index on cards kept up to date is a **necessity of** safe administration, to guard against buying duplicates and **chiefly to** answer most directly and quickly the constant question — is **such a** book in the library?" -- *Lib. Notes*, vol. 1.

The Card Catalog is a series of cards properly ruled for **their** special use, of exactly the same size, and standing on the **edge in** drawers, boxes, or trays. They may be arranged on any plan, **alfa-**betically by subjects or titles, or by numbers or dates. **Blocks, guides,** cards, devices to prevent drawers from spilling or cards from being **mis-**placed, locks, and label-holders and various other ingenious and **almost** essential accessories are now used by all who know of them. **The great** feature which has caused librarians the world over to count the **card** catalog as the greatest library invention, is the ease of keeping it **up to** date and in perfect order. A new card can be put into place **anywhere** at any time. A single reference takes the place of search **thru pages** of Mss. It never becomes out of date or useless. Anything **can be** removed, it wished, by simply lifting out its card. The **guards allow** cards to be added or withdrawn by the proper person with the **greatest** ease, but prevent others from removing or confusing their order. **The** cards, being cut by special machinery to an exact size, are turned **thru** the fingers with great rapidity in looking up any matter, and **the** guides enable one to open very near the exact place at sight, and **every** card has the name, number, or subject by which it is arranged **written** on the upper edge. From an author's catalog it has spread to an **almost infinite** application. Every list, record, index, etc., that is **in a** state of growth can be thus kept with great saving of labor. **Business** houses find it invaluable for lists of goods, customers, discounts, and the 1,000 growing records of commerce. Science adopts it even **more** widely, and its use is spreading with growing rapidity. Each **item** being on a separate card, the whole may be rearranged over and **over** by simply shuffling into the new order. There is no copying **nor** waste of labor. Its enormous advantages once learned from use of **a** perfect outfit, it is sure to be applied to new uses.

Description and Price List of patent L. B. Card index Outfits.

Perfection of details is of the utmost importance in securing the best working outfit, and this comes from experience rather than cost. Those offered by the Library Bureau represent the experience of the Coöperation Committee of the American Library Association, of the Library School, and its own 20 years of making for library and commercial use. Prices are as low as good work and material will admit.

Cases

Two grades of workmanship and materials are kept on hand, in antique oak, mahogany, and walnut. Any other arrangement of drawers or finish of case made promptly to order.

Cheap Form Cases (Nos. 22-0 to 22q) have white wood, hand dovetailed, extra strong drawers, provided with the L. B. stop checks to prevent pulling out and spilling, are thoroughly made throughout, and handsomely finished. Formerly the best grade used, now largely supplanted by the more durable.

L. B. Slide Cases (Nos. 22 x 3 to 22 x 28). These are fitted with the well-known L. B. slide, which enables the drawer to be pulled out to its full extent clear of the case and held at right angles to it.

Cut showing L. B. patent drawer

There is no sagging of the drawer nor straining of the frame-work around it, and the friction is so removed or divided that a heavily-loaded drawer runs with ease. The end cards at the rear of the drawer can be seen and handled as readily as any, thus increasing the usable capacity 5 to 10 per cent over the "cheap form" of the same

22 A 6 open

length. Not only is there a saving of space, but a greater one of wear and tear in a much-used case. All slide cases have hard-wood interiors throughout, the sides are cut down so as to handle the cards at their corners, and the cases are increased in depth over the ordinary pattern, thus increasing the capacity without proportionately increasing the cost. They have a double moulded top, are heavily paneled and are finished in the very best manner.

Special cases. We often build to fit vaults and safes already in use, or some particular allotment of space; for this estimates will be furnished on receipt of requirements and specifications.

We have workmen skilled in every detail of a card index. If any odd size or finish of case is desired, it will be found to the advantage of the buyer to have *us* make it. The novice, no matter how good a cabinet-maker, is not at all likely to produce on first or second trial an outfit that has taken the Bureau years to perfect.

In libraries or elsewhere where a large number may desire to consult the catalog at one time, tray cases are better than large drawer cases or several cases. These are described below. The drawers only allow of one consulter at a time before each tier; trays or small sections which can be taken out and carried about the room thus serve a larger number.

Tray cases. (Nos. 22d 2 to 22d 96.) These have been devised to fill two requirements. The smaller tray outfits furnish a more portable and convenient form than drawers afford for an index of a few thousand references, and the larger outfits meet the demands of large libraries for a form of card catalog requiring less floor space than the L B cases. Tray cases can be built against the wall, and the full space from the floor to the highest point within arm's reach utilized.

The trays are removable and can easily be handled, each tray being only one half the width of an L B drawer and two thirds the length, holding a single row of cards. The catalog is thus divided into small sections enabling more persons to consult it at any one time, a very important advantage in libraries. Small tray cases are sold by the thousand; while the larger tray outfits have been adopted in place of drawers at the Boston Athenæum, St. Louis public, McGill college, Princeton college, New York State, and other large libraries, and have been found the most satisfactory plan for storing a large catalog.

The 12, 15, and 20 tray cases are made flush ends and top, so libraries may buy sections as they require and build up. The others have finished mouldings. All are handsomely paneled, and are finely finished.

Beside the case for holding the cards, the following interior fittings are required to secure the best results:—

Blocks. These are triangular blocks at each end of each row of cards, giving them the proper angle for easiest reference. The front block is glued in place to prevent sliding in opening and shutting the drawer, the rear one is adjustable and can be fixed at any point. This enables the user to shorten the card space in each drawer so as to fit any number of cards and approximately assign space of a full case, as it will ultimately be filled. Four blocks are required to each drawer, or two to each tray.

Guides

Next in importance to having the cards legibly written and arranged in strict order, is the insertion of frequent and legible guides. These mark location closely, and enable the users to turn instantly to any desired name, topic, or number in the card index. With the outside of the drawer labeled to indicate limits of each section, one goes to the case, however large, and “runs down” the reference desired at sight. The guides point both ways, and if used with proper frequency reduce the handling of the cards to a few turnings. Where the catalog or index is much consulted, guides should be used with great freedom; one is not likely to err on the side of having too many.

Bristol guides are from specially prepared bristol board made of linen to secure the greatest durability, cut so as to allow an upright projection above the cards of one fifth, one third, or one half length, according to the space needed for title. This projection is one half cm. wide, and so cut that in the series of two, three, or five guides standing in sequence, one does not obstruct the reading of the other. The bristol guides have largely taken the place of all other forms because of cheapness, ease of writing, and cleanliness.

24f1. Bristol guides. Size for No. 32 cards. Cut in half, third, and fifth lengths. Made in white, salmon, buff, and blue. \$5.00 per 1000.

24f2. Bristol guides. Same as 24f1, only to fit No. 33 cards. \$6.00 per 1000.

Printed guides. To obtain the most legible guides possible we have invented machinery which enables us to print any series of headings in clear type at very little more cost than writing in longhand or on the typewriter. The gain in distinctness is great.

For one copy of any special series to order the charge is 2c. per

guide for printing; each additional impression **50c.** per 100. Copy of headings should be sent in strict alfabetic order. Samples, printed or plain, sent on application. See next page for illustration.

The following standard forms are carried in stock : —

24f4. A to Z guides. Size for 32 cards. Price, **25c.**

24f5. A to Z guides. Size for 33 cards. Price **25c.**

24f6. Month guides. Names of the months. Size for 33 cards. Made in buff and blue. Price per set, **15c.**

24f8. Week guides. Names of the days of the week. Size for 33 cards. Made in buff. Price per set, **10c.**

24f10. Day guides. Numbered 1 to 31. Price per set, **30c.**

24f12. State guides. Names of the states and territories. Size for 33 cards. Made in buff. Price per set, **50c.**

Patent lock-guard rods. A steel rod with brass knob or thumb-screw is passed from the front or face of the drawer through the cards, which are properly punched for that purpose. A simple mechanism, which is hidden by the brass escutcheon on the drawer front, locks the rod in place. It is unlocked by a few turns of the hand, and can be removed instantly if desired. These obviate the possibility of cards being taken out or misplaced by the careless or mischievous, as well as prevent cards from "jumping" when the drawer is closed quickly.

Label-holders on the drawer front, made of solid bronze and very handsome, to frame safely cards which indicate the limits of each section.

Prices: fitting labels 2 x 5 cm. and 2 x 7½ cm., **15c.** each; 5 x 7½ cm., **20c.** each.

Printed labels for insertion in label-holders accompany each complete outfit. These assign space in drawers, and serve as guides in consulting or placing cards in the index.

Patent locking attachment. In many instances there is a necessity for locking the card index outfit from the curious, careless, or mischievous, to guard valuable or confidential lists from being tampered with. The patent L. B. attachment is effective, takes no space from the capacity of the drawer and does not increase the size of the case. It is an ingenious device by which every drawer is locked automatically. It is only applied to cases when so ordered, and costs **50 cents** per drawer additional.

Outside locking attachment. This is a handsome brass bar with padlock in front of each tier of drawers. It can be removed with-

Cut showing drawer fitted with printed bristol guides.

out disfiguring the case, and readily applied when wanted. This device is used largely on the cheaper form of cases and applied to any.

Price, **\$2.00**, for each brass bar and fixtures.

Cards

It is of the utmost importance that these be accurately cut, and in every respect as perfect as experience and ingenuity can make them. The Bureau has at large expense fitted up machinery for producing perfect cards OF EVERY GRADE.

Its cards will be found to have a true edge on both sides, headlines and margins of uniform width, and every card exact in height, thus making consultation easy and quick. Years of experience have proved that the best results in card indexes and catalogs can be attained only when each individual card is perfect in itself, and of exactly the right size.

These results have been attained by long trial and the use of special machinery invented and used only by us. No other house in the world is fully equipped for this work.

Things to avoid

Cards of varying heights. In fingering it is almost impossible to catch and separate a short card from a tall one.

Machine-cut Cards. All cards should have a square equal edge on the top for handling. Cutting by machine or die leaves one edge rounding, the other with a "burr." We have tried both die and machine cutting, after incurring large expense for special dies, and have found the result unsatisfactory after years of trial.

Round corners. These are a necessity with die-cut cards, but entail the loss of the sharp, square corner, so useful in quick handling.

Varying head and down lines, which seriously affect legibility of the index. The L B cards of all grades will be found without these defects.

Sizes. The following standards have been more widely adopted than all others combined :—

No. 32. 5 x 12 1-2 cm. (2 x 5 in. approximately) is the one formerly adopted by libraries for author and title catalogs, now however largely displaced for this purpose, by No. 33. It gives space for brief entries only.

No. 33. 7 1-2 x 12 1-2 cm. (3 x 5 in. approximately). This is the most used size and of a height to be read easily. The cards when standing at the angle given them by the blocks at each end of each row, show the larger portion of their surface without further separation, while in

shorter cards there is a possibility of having to hold them apart for reading if the drawer or tray is at all full. This size is large enough for nearly all requirements. The danger in adopting a special size is of its being larger than needed. The practise of writing on the page of a blank book often leaves the sense at first that a condensed card is inadequate. The desire for a large card is more from mental habit than actual requirement. A list is apt to grow into greater dimensions than anticipated, and the large card increases bulk and cost of both cards and cases. We therefore urge our clients to adopt our standard for which we have every device and accessory made to fit. With an odd size these important helps have to be made to order at extra cost and consequent delay.

These standards have been in use nearly twenty years and adopted and recommended by the Library Association and School, and found for all longhand work the most satisfactory.

Typewriter cards 6.1-2 x 10 cm. (2 3-8 x 4 inches) have been used largely for typewritten indexes. This gives sufficient length of line for name and number when written on the machine, tho it crowds the space if in longhand. These are furnished from any grade of stock. Prices for cases, fittings, and cards for this size on application.

Larger cards are sometimes a necessity. The L B standards are 10 x 15 cm. (4 x 6 in. approximately), 12 1-2 x 20 cm. (5 x 8 in. approximately), 20 x 25 cm. (10 x 12 in. approximately). These are usually for special forms, and have to be made to order, but cut readily from the standard L B large sheets. These and the cases with fittings are matters for special estimate.

Punching. Most cards sold are punched for the guard rod. Without punching they are 15 cents per M less than prices given.

Ruling. The standard ruling for library use is shown in the diagram on page 29. Any special ruling can be had to order. Cards without down lines are carried in stock at same price.

For typewriter use cards without the cross lines, except the head line, are preferable. The head line enables the reading of the initial entry more quickly, and gives uniformity to the series.

The L. B. standard linen cards are from linen ledger stock. Our paper mill put in an entirely new engine of special power at large expense, to produce bristol from linen stock. We now offer linen ledger paper in our heaviest weights, with the result that years of handling will not materially affect our cards, while the best cotton stock presenting as good a surface for writing upon will wear below the newly added cards. In some libraries we have seen this to a half centimeter.

The value of the labor involved in making any kind of an index for permanent use makes the cost of durable linen ledger, as compared with cotton (suitable only for temporary uses), a trifling matter.

When we remember that many of the card indexes written within the year will be in use fifty years or more to come, the unwisdom of selecting inferior stock because of saving in expense is emphasized. We know of more than one card outfit practically ruined for a perfect working index by the insertion of one lot of cards imperfectly cut and of inferior material. The cards may cost from \$2.00 to \$3.00 per thousand, the writing and arranging five times as much.

The L B standard cards are made in **white, salmon, buff, and blue** in following weights:—

1. The finest double weight linen ledger, with the best possible surface for erasure. The hard, sharp edge, when cut into cards, compensates largely for the thickness of the heavier weights in quick handling. For large indexes, where space occupied and cost are important items, this is the wisest selection. Without this necessity, the incomparable "x" is best.

PRICES.

No. 32l, L B standard linen cards ($5 \times 12\frac{1}{2}$ cm.), per M . **\$1.60**
 ✓ No. 33l, " " " " ($7\frac{1}{2} \times 12\frac{1}{2}$ cm.), " . **2.25**

r. Made of the same material, but one half thicker than "l." It gives a reduction in space occupied and cost over "x," tho does not fully equal it for quick handling.

PRICES.

No. 32r, L B standard linen cards, per 1,000 . . .	\$2.00
No. 33r, " " " " " " " " " " " " " " " "	3.00

x. A double-weight mill bristol made for us of the highest grade, to give the best possible index cards. It is heavier than any stock carried by paper dealers, and is finished with reference to its special use. The thickness makes it handle easiest ; the hard stock of which it is composed, to wear longest under continued use, and bear erasure best. Where space and expense are not serious obstacles, this stock has no competitor for favor.

PRICES.

No. 32x, L B standard linen cards, per 1,000 . . .	\$2.60
No. 33x, " " " " " " . . .	3.75

L B cotton cards. Made in same weights, and cut, ruled, and punched with same care as the standard linen ledger. These are from cotton stock, and equal in writing surface any made. They however lack the wearing qualities of the L B standard.

Where lists are changing rapidly, or for any reason are temporary, these cards are good enough; in some instances users are unable to pay the price of the highest grade; and in the few, where people buy the low priced, whatever their needs, they meet the competition of less satisfactory stocks.

PRICES.

	1c.	2c.	3c.
No. 32,	\$1.10	\$1.35	\$1.75
No. 33,	1.50	2.00	2.50

L B cheap cards. These are a lower grade of cotton stock than the above, tho affording a good surface for writing upon. Recommended for temporary purposes only. Made only in the thickness of "1" and "r" and may be had in colors.

PRICES

	lh.	rh.
No. 32,	\$1.00	\$1.35
No. 33,	1.25	1.75

We also carry in stock thin linen and cotton slips much used in preparing printers' copy of a library catalog. See 32 and 33 d and h.

Colored cards. Buff, salmon, and blue cards of all standard rulings are kept in stock *l*, *r*, and *x*, in the L B standard cards. These different colors assist the classing of separate indexes into one alphabetical series, distinguishing each by its own color; *e. g.*, author and subject cards of a library.

Plain cards. For typewriter use, for printing, and other purposes, cards without rulings are often preferred. The cost of cutting plain stock is much less than ruled. We furnish the L B standard cards *unruled*. Price on application.

Discount of 5, 10, 15 or 20 per cent on 5, 10, 15 or 20 M. in one order. Samples of the different weights and rulings on application.

Notes. Experienced users have learned that the practical success of the system is largely dependent on many little details which can be learned only by study and long experience. An outfit which seems to the novice the same, or at least to answer well enough, is found later to require entire remaking in order to secure satisfactory results. Those not knowing of the headquarters often make, or have made, or buy, an outfit imperfect in its details, and that can never give satisfaction to one who has used the library standards, and, in many cases, fail to discover why they are less enthusiastic over the merits of the card system than some friend who has a proper equipment. Often, if not usually, they pay more than the Bureau charges for the best. Occasionally some one attaches some practically worthless new feature, stamped "patented" or "patent applied for," and on the strength of this induces those who do not know a better and cheaper way to pay a high price for something inferior for practical use.

The Library Bureau is the only house in the world devoted to the special business of fitting up libraries. With the coöperation of these great users of the system, it has, at the cost of protracted experiments, perfected these details, and had special dies, models, and machinery made, so that we now manufacture everything pertaining to the card system, of the best practical form and in a variety to suit all wants.

Many make the mistake of buying too small accommodations for their needs in library cataloging. From 3 to 5 cards per volume is a sufficiently low estimate upon which to base the selection of an outfit.

Prices of outfits are net. All expenses of packing and delivering to the Express Co. or R. R., are borne by the Bureau.

Price list of outfits

Only the standard L B linen cards are used in making up the following outfits. If because of cost or for temporary use the L B cotton cards are desired they will be substituted at a corresponding reduction from these prices.

Small tray outfits. These afford all the material needed for a very small catalog or index. For the individual beginner of a card catalog, business list, or index, this is a most useful device. The cards and guides are exactly the same as used in the larger outfits, and can be transferred to them as growth demands. The trays are filled with any of the three thicknesses of cards desired, though unless otherwise specified / cards are supplied.

22c1 outfit. Tin tray with covers, 650 No. 32 / cards; special bristol index a to z; blocks giving cards best angle for reading, and guard wire, complete **\$2.00**

22c2 outfit. Same as 22c1, with No. 33 size cards, more generally used, complete, with 800 No. 33 / cards, **\$2.75**

22c3 outfit.* Same as 22c1, only tray is of wood covered with marble paper and without covers, ... **\$1.50**

22c4 outfit.† Same as 22c3, for 33 size cards **\$2.40**

22c5 outfit.‡ Same as 22c1, except tray is handsomely finished oak and without covers, **\$2.00**

22c6 outfit.§ Same as 22c5, for 33 size cards **\$2.75**

22c7 outfit. Oak tray with cover, 1000 No. 33 / cards, bristol a to z index, blocks and lock-guard rod, complete, **\$5.00**

Without cards or guides, **\$2.75**

* Numbered 22d1 in editions previous to 1895. † 22d2 in editions previous to 1895. ‡ 22d3 in editions previous to 1895. § 22d4 in editions previous to 1895.

Size, outside, 31½ cm. (12½ in.) long, 11 cm. (4½ in.) high, 34 cm. (13½ in.) deep.

22d2 outfit.* A finely finished case, with two hard wood trays, each tray holding 1,000 33 / cards; in oak or walnut; complete outfit, including 2,000 33 / cards, 100 guides, patent lock-guard rods, patent blocks, label-holders, and printed labels **\$9.00**
Without cards or guides **5.00**

In mahogany, 50 cents additional.

Size, outside, 31½ cm. (12½ in.) long, 21½ cm. (8½ in.) high, 34 cm. (13½ in.) deep.

22d4 outfit.† Same as 22d2, except with four trays; in oak or walnut; complete, with 4,000 33 / cards, 200 guides, patent lock-guard rods, patent blocks, label-holders, and printed labels **\$15.00**
Without cards or guides **8.00**

In mahogany, \$1.00 additional.

* Numbered 22d6 in editions previous to 1895. † 22d7 in editions previous to 1895.

Size outside 19 1/2 cm. wide by 31 cm. long 34 cm. high 13 1/2 cm. deep.

2245 outfit. Same as 2244 except with six trays, one for each letter, and a lock. Price \$100.00 plus patent lock-guard and patent lock. Price of outfit \$122.00

Price of outfit, including lock, \$122.00

Including lock, \$131.00

2249 outfit. Same as 2244 except with nine trays, three high in each column. Price \$100.00 plus \$50.00 plus patent lock-guard and patent lock. Price of outfit \$181.00

Price of outfit, including lock, \$181.00

Including lock, \$191.00

Size outside 19 1/2 cm. wide by 31 cm. long 34 cm. high 13 1/2 cm. deep.

The outfit consists of a small metal cabinet, six trays, one for each letter, and a lock. The outfit is made of metal and is very durable. It is the best private outfit for the money.

Larger tray cabinets. The outfit for the larger tray cabinets is shown on page 23. It consists of a metal cabinet and a tray. The tray has a capacity of 1000 g. of material. The outfit is made of metal and is very durable. It is the best private outfit for the money.

The outfit for the larger tray cabinets has a capacity of 1000 g. of material. It is the best private outfit for the money. It is made of metal and is very durable.

Price of outfit, including lock, \$191.00

Price list of L B slide cases

22x. All 22x cases are fitted with the L B slides, as described on a previous page, and except x3 have drawers with 50cm. (20 in.) clear space for cards in length instead of 40cm. (16 in.) as in the cheap form (Nos. 22-o to 22q); and every detail as perfect as the long experience of the Bureau dictates. The increased capacity of each drawer, better materials and construction, make these cheaper for long use than the less costly patterns. We commend these cases to all buyers as the best results of a careful study of every point, and of the labor of trained employees.

Cut of 22x3 case. Size, outside, 39 cm (15½ in.) long, 39 cm. (15½ in.) high, 50 cm. (20 in.) deep.

22x3 outfit is for No. 33 cards and consists of 3-drawer L B slide case in oak or walnut, 12 patent angle blocks, 500 bristol guides, 6 patent lock-guard rods, 6 label-holders, with set of printed labels, and cards to fill the case.

Complete, with 9,000 33l cards	\$36.00
" " 6,000 33r "	35.00
" " 4,500 33x "	34.00
Without cards or guides	19.00

In mahogany, **\$3.00** additional.

22x6 case. Size, outside, 73 cm. (29 in.) long, 39 cm. (15½ in.) high, 61 cm. (24 in.) deep.

22x6 outfit, for No. 33 cards, consists of 6-drawer L. B. slide case in oak or walnut; 24 patent angle blocks, 1,500 bristol guides, 12 patent lock-guard rods, 12 label-holders, with set of printed labels, and cards to fill the case. Rods, blocks, and label-holders are fitted.

Complete, with 22,500 33l cards		\$76.00
“ “ 15,000 33r “		73.00

“ “ 37,500 33r “	155.00
“ “ 28,000 33x “	150.00
Without cards or guides	75.00
In mahogany, \$12.00 additional.	

Size outside is 107 cm. (42½ in.) long, 61 cm. (24 in.) high, 61 cm. (24 in.) deep.

Nos. 22x12 and 22x15 are same as 22x9 shown on preceding page, except one and two rows of drawers higher, respectively. Bases for these cases will be found on p. 49.

Standing desk outfits. These are handsomely finished cabinets of a hight and with a sloping top for a standing desk. One cannot go below a certain point in consulting the card index without its being very inconvenient, nor above a given point without its being difficult; this standing desk gives a happy medium. Twenty inch closets below the drawers give valuable space for the storage of stationery, cards, and other material, and the desk itself fills another purpose than for the card index alone. They are of handsome finish, paneled on three sides, made throughout of hard wood, and fitted with the L B slides.

In offices where space is limited this form of case solves the question: where shall the card index be kept? the desk taking the place of the ordinary form, and is not less available as an index.

22 x 18 desk outfit, for No. 33 cards, consists of 18-drawer L B slide desk (shown in cut on next page), in oak or walnut, 72 patent angle blocks, 3,000 bristol guides, 36 patent lock-guard rods, 36 label-holders, with set of printed labels and cards to fill the case.

Complete, 72,000 33l cards	\$215.00
" 48,000 33r "	205.00
" 36,000 33x "	200.00
Without cards or guides	100.00

In mahogany, **\$20.00** additional.

22 x 21 desk outfit. Same as **22x18**, except it is 7 drawers high instead of six. With complete fittings. Oak or walnut.

Complete, 84,000 33l cards	\$250.00
" 56,000 33r "	240.00
" 42,000 33x "	230.00
Without cards or guides	115.00

In mahogany, **\$25.00** additional.

22 x 28 desk outfit. Same as **22x18**, except 7 drawers high and 4 long. Oak or walnut. Outside length of desk: 150 cm. (58½ in.)

In mahogany, **\$35.00** additional.

22x18 outfit. Outside size 110 cm. (43½ in.) long, 70 cm. (27 in.) deep.

See preceding page for prices.

The following L B slide cases are furnished to fit cards 5 x 12½ cm. No. 32 of the L. B. Catalog. They are of the same dimensions as cases for No. 33 cards, four drawers in high requiring exactly the same space as three for the larger card, thus the illustrations in previous pages show exteriors for both, and obviate the necessity of cuts in this connection.

22y4 outfit, for No. 32 cards, consists of 4-drawer L B slide case, same outside dimensions as 22x3 in oak or walnut, 16 patent angle blocks, 600 bristol guides, 8 patent lock-guard rods, 8 label-holders, with set of printed labels and cards to fill the case. Rods, blocks, and label-holders are fitted.

Complete, with 6,000 32x cards	\$35.00
“ “ 9,000 32r “	36.00
“ “ 12,000 32l “	37.00
Without cards or guides	20.00

In mahogany, cost **\$3.00** additional.

22y8 outfit, for No. 32 cards, consists of 8-drawer L B slide case, same outside dimensions as 22x6 in oak or walnut, 32 patent angle blocks, 1,500 bristol guides, 16 patent lock-guard rods, 16 label-holders, with set of printed labels, and cards to fill the case. Rods, blocks, and label-holders are fitted.

Complete, with 15,000 32x cards	\$72.50
“ “ 20,000 32r “	75.00
“ “ 30,000 32l “	77.50
Without cards or guides	40.00

In mahogany, **\$5.00** additional.

22y12 outfit, for No. 32 cards, consists of 12-drawer L B slide case, same outside dimensions as 22x9 in oak or walnut, 48 patent angle blocks, 2,500 bristol guides, 24 patent lock-guard rods, 24 label-holders, with set of printed labels and cards to fill the case. Rods, blocks, and label-holders are fitted.

Complete, with 22,500 32x cards	\$100.00
“ “ 30,000 32r “	105.00
“ “ 45,000 32l “	112.50
Without cards or guides	55.00

In mahogany, **\$8.00** additional.

Bases for Outfits

To secure the greatest convenience in consulting cards, the standard index cases are made the right height for easy reading of both the upper and lower drawers, when case is on a base or table of the proper height. No one, unless compelled by limited space, is willing, after any experience, to consult the lower drawer stooping over or the upper one standing on tip-toe.

The L. B. bases are substantial cabinets, giving for a library or business house needed shelf room for reference books, storage of cards or other materials, and a stand of just the right height for easiest consultation of all the cards. Many users do not have just the place for the index. The library table top is needed for other uses, besides being a trifle low; the revolving bookcase is too high and too small for any except the single-tiered case, while to have a base made by local workman costs one-half more than the standard patterns, made in large quantity by the Bureau. The Library Bureau bases will be found a great convenience, and worth their cost for other uses.

The bases shown by the following cuts, with the exception of **22w**, are for Nos. **22-o** to **22q** cases. We make the same general forms of the size for **22x3** to **22x9** cases; *i. e.*, **22w3** is the base for **22x6** as shown. The heavy paneled end is used on all higher grade bases to match slide cases. The following are prices of different patterns of best grade bases:

22w1 base, for **22x9** and **22y12** cases, with doors, paneled on all four sides as shown in cut of **22w3**, and has adjustable shelves; price, **\$25.00**. In mahogany, **\$32.00**.

22w2 base, same as **22w1**, except that it fits **22x6** and **22y8** cases; price, **\$22.00**. In mahogany, **\$28.00**.

22w3 base, for **22x6** and **22y8** cases, shown in cut on following page; price, **\$15.00**. In mahogany, **\$20.00**.

22w4 base, the same as **22w3**, only for **22x9** and **22y12** cases; price, **\$18.00**. In mahogany, **\$21.00**.

22w6 base, like **22u2**, but for **22x9** and **22y12** cases; price, **\$11.00**. In mahogany, **\$13.50**.

22w7 base, like **22u5**, but for **22x3** and **22y4** cases; price, **\$8.00**.

The above are furnished in oak or walnut; any other wood made to order.

22w3 base with **22r6** outfit.

22w3 Base	in oak or walnut	.	.	.	.	.	.	\$15.00
	in mahogany	.	.	.	.	.	.	20.00

22u2 Base. A fine finished, strong table for 22g and q outfits.
In oak or walnut. Price **\$10.00**

22u3 Base. For 22g and q outfits. Open front and back, thus giving four shelves, 90 cm. (36 in.) long, for reference books. Ends are paneled to match index cases. Oak or walnut. Price . **\$12.00**

22u4 Base. Same as 22u3, except shorter. Fits 22f and p outfits. Price **\$10.00**

22u5 Base. A very attractive stand for 22-o and e outfits, with shelving for a few of the most used reference books. Made in oak or walnut. Price **\$7.50**

23. Trays. A very great convenience, either used alone or in working over cards before putting them in the drawers. One who has used them will never be without. With or without covers, and with or without partitions. The covers keep out much dust, but add to cost, and are less convenient for current desk work. For small card index outfits covers are best. The partitions serve to separate the contents into five distinct boxes. This has the advantage over guides of leaving the cards loosely arranged, so that the eye often sees the exact card wanted, without aid from the fingers. Where covers are not used, trays two-thirds high of card are better, as, while they hold the cards equally well, it is much easier to handle and to read them when they project above the sides, and the light also reaches them much better.

For No. 32 cards. $5\frac{1}{2} \times 13 \times 21$ cm ($2 \times 5 \times 8$ in.).

	WOOD COVERED WITH PAPER.	TIN.	HANDSOMELY FINISHED ANTIQUE OAK.
23j, plain	\$0.25	\$0.40	\$0.50
23j, with 5 divisions	.40	.60	.75
23j2, with 5 divisions, $\frac{3}{4}$ high	.40	.60	.75
23k, with covers		.60	
23l, with divisions and covers		.75	

For No. 33 cards. $8 \times 13 \times 26$ cm ($3 \times 5 \times 10$ in.).

23p, plain	\$0.30	\$0.50	\$0.60
23q, with 5 divisions	.40	.75	1.00
23r, with covers		.75	
23s, with divisions and covers		1.00	

See page 32 (under No. 22) for description of card index outfits in trays.

24. Card index fittings. See pages 24 and 25.

Charging Systems

Of the various systems of charging loans those described in the following pages have given the best satisfaction and are more generally used than others. Some modifications may be found necessary in applying them to peculiar circumstances, but one or the other of these systems will be found easily adapted to the conditions in any public library.

Slip System. The charge is made on a slip of manila or other paper, size 5 x 5 cm (Cat. No. 34b1), or 5 x 7½ cm, (Cat. No. 34b2), first the number of the book, then the borrower's number with date. The slips are arranged consecutively by book number in the movable trays of a 25a Sloping Slip Case, each day's circulation occupying one tray. Each column is complete in itself, and movable. The whole series is slid one to the right each day, allowing the newly emptied column to be inserted at the head, thus saving all transfer of slips. The right-hand column shows overdue books.

In libraries where a very small number of books are circulated one of the various styles of 25b Slip trays can be used instead of 25a.

25a. Sloping Slip Case. A series of 20-compartment, movable tin trays, held at the proper angle by handsome wood case, with tight-fitting dust cover.

Libraries open every day in the week require 15 trays; three or four days, 10 trays; and those two days, 5 trays. Each tray

will hold 2,000 slips, though more convenient with half that number.

PRICES

15-section, charging case complete	.	.	.	\$25.00
10 " " " "	.	.	.	15.00
5 " " " "	.	.	.	10.00

The 15-tray case is fitted with 3 drawers, giving space for a card catalog of 3,000 cards, or for storage of charging slips.

34b. Call Slips. Plain manila, white or colored paper, cut into small slips 5 x 5 cm (2 x 2 in.) or 5 x 7½ cm (2 x 3 in.), and used for charging loans, memo., etc. 34b1, 5 x 5 cm call slips, **15c.** per 1,000; 34b2, 5 x 7½ cm call slips, **20c.** per 1,000. Indicate color desired.

25b. Slip Trays. Small trays for holding 5×5 and $5 \times 7\frac{1}{2}$ call slips, so much used for mem's, and for charging loans. Each compartment is $5\frac{1}{2}$ wide by 2 cm long. The following fit $5 \times 7\frac{1}{2}$ slips:—

25b1.	5	compartment tray, tin		.40
25b2.	10	" " " in 2 rows of 5 each		.65
25b3.	10	" " " " " " " " " " " "		.65
25b4.	20	" " " " in 2 rows of 10 each		.75

For 5×5 cm slips, order trays of above numbers, *but two-thirds high*.

For the $5 \times 7\frac{1}{2}$ slips are also trays in oak and in wood covered with paper. Each compartment is 8 cm wide by 2 cm long.

25b5.	5	compartment tray, oak		.75
25b6.	5	" " " wood covered with paper		.20

Book-card and pocket system. This consists in the use of (1) a card pocket (39c1 or 39c2) for each book, (2) a book card (charging card 34a) for each book, (3) a 25c charging case or receptacle for holding the book cards of the books which are out, (4) a borrower's card for each person entitled to draw books.

The borrower presents his card together with a call slip giving the numbers of the books wanted, the book is found on the shelf, the charging card is taken from the card pocket, and the number of the borrower and the date is placed thereon, the date being stamped also on the borrower's card; the borrower's card is then placed in the card pocket, and the book and his card delivered to him. The charging card is placed in the charging case, and forms the record that that book is out of the library, having been taken by borrower No. ————. On returning the book the borrower again presents his card with the book, the charging card is taken from the case, both are stamped with the date returned, the charging card placed back in the card pocket, the borrower's card returned to him, and the book placed on the shelf, thus completing the transaction.

39ci. Acme pockets. These card pockets are in general use, and are recommended by librarians as being most serviceable and satisfactory. The end of the pocket should be turned under, and the whole pasted into the book with Higgins' Drawing Board Mucilage or other preparation, thus forming a perfect pocket for holding the charging card while the book is in the library, and for holding the borrower's card while the book is out. This is not only a convenience to the librarian, but to the public as well. The rules of the library pertaining to the loan of books should be printed on the pockets.

25c. Charging case. An oak case with cover, having two compartments for cards 12 1-2 x 7 1-2 cm. on end, with a capacity of about 2,000 34a cards and the necessary guides. These guides are printed with the days of the months, so that the librarian can tell at a glance how many books are over due on a given day. The charging cards are arranged under each date in order of book number. Price, complete case and date guides **\$4.50**

Borrower's Card. The 34a charging card can be used for a borrower's card as well, though there are many other good forms. An economical card is that adopted by the N. Y. State Travelling Libraries. The following diagram shows face of the card, the back being ruled similar to the face below the agreement for additional records of loans.

Price, with name of city or town and library printed in, if ordered in quantities of 1000, **\$4.00** per 1000.

Stamps and Dates

L. B. Dates. In library work dates are constantly used and often in places (e. g. on borrowers' or other cards of the charging system) where space is limited, and the need of quick work makes it difficult to get the date in the space assigned. The system of date abbreviations devised by Melvil Dewey in 1878 has proved its claim good to be the briefest possible without new signs and with perfect freedom from ambiguity, and it is clear to those who see it for the first time.

The common plan of using numbers for the month should be abolished, as about half the world reads 2/3 as Feb. 3d and the other half as 2d of March; and each stoutly insists that to read it the other way is a blunder. Taking the average of the year the L. B. dates are shorter and free from all danger of mistake. The series for the months is —

Ja F Mr Ap My Je Jl Ag S O N D

The date is written with day, month, and year in logical order, and, as the letter separates the figures, no lines or periods are needed; e. g. 3 F 89 is 3d of Feb. 1889.

Price, 26a, L. B. System, Rubber Dates. Days, months, and years complete in box with forceps, **40c.** per set.

26d. Lever Self-Inker. This patent lever self-inking, dating and printing stamp, has a new principle of action. By a simple motion the lever is brought forward, carrying the die from the inked cushion to the plate on which the impression is made. It springs back to place automatically. A very important feature is the interchangeable dies. One can use as many different dies as he chooses in the same mechanism either with or without dates. The change can be made in a second.

26d4. Lever Dater. Smaller and cheaper form of 26d1 for dating only. This is our most popular style. All stamps fitted with gage for registering in the small spaces of a borrower's card, and complete set of L. B. dates, ink, etc.

Price, 26d4 Lever Dater . **\$4.00**

26e. Self-Inking Library Dater. These were the first dating stamps with rubber type offered to libraries, and are undoubtedly in use today in more of them than any other form. They are durable, simple, and easily cared for, but are not as noiseless as the Lever Stamp. Fitted with gages for stamping in exact spaces, and supplied with complete set of L. B. Dates, for **\$5.00**.

26f. Self-Inkers. Used either for printing or dating. Have great advantages over the platform stamps. May be used on books as well as on cards or single sheets. For a slight extra charge a die with any words wished can be put on any of these daters, so as to stamp at the same time with the dates. Complete with L. B. Dates.

PRICES

3 x 3 cm plate	.	.	.	.	\$3.00
3 x 5 cm "	.	.	.	.	4.00

26g. Pad Dater. Hand stamp. Most compact, and admits of dating in inner margin of books, etc. Complete, with dates, pallet, and ink pad, 75c.

26h. Pencil Dater. A movable pad dater attached to a lead pencil; a slight motion of the hand stamps the date much plainer than it can be written, without removing the hand from the pencil. Of great service at the loan desk, where books must be charged rapidly. Devised at the Milwaukee Public Library, and adopted by many others.

Price, dater and L. B. dates, complete, 75c.

26i. Automatic Numbering Stamp.

For registering the accession number in books, on cards, etc., and in banks and commercial offices for numbering checks, stock certificates, etc. The figures shift automatically and can be changed from consecutive to duplicate and continuous numbering, by moving the pointer on the dial.

4-wheel, 1-9999	. \$12.00
5-wheel, 1-99999	. 14.00
6-wheel, 1-999999	. 16.00
7-wheel, 1-9999999	. 18.00

26i4. Numbering Stamp. A cheaper form than 26i. Figures change automatically; can be adjusted to print any number of times; not so durable, but ample for offices and libraries where a stamp is not largely used.

PRICES

4-wheel numbering machine, 1 to 9999	\$9.00
5-wheel " " 1 to 99999	10.50
6-wheel " " 1 to 999999	12.00

26i3. D. C. Numbering Stamp. For users of the Decimal Classification a special stamp has been made, providing for two decimals ; i. e., for five figures of the classification. Used for printing the class numbers on cards, book-plates, and labels. It has not only proved a genuine labor-saver, but adds uniformity and legibility to the catalog.

Price, 26i3 5-wheel D. C. Stamp **\$25.00**

26j. Book Number Stamp. A three-wheel stamp, made specially for the Cutter notation (see 13b). Two stamps are required, one giving the alphabet A-M, the other N-Z, in combination with the places of figures. Price, three-wheel stamp, **\$20.00**

26m. Embossing Stamp.

Needed to mark the name and place of the library on the title pages and all plates, maps, and inserts not printed on the regular forms, and therefore liable to be removed. If the stamp is properly made it is impossible to iron out its impression so that it cannot be detected if the sheet is

held up to the light and the broken fibres examined. A rubber stamp used to mark titles and plates is apt to stain, blot, or offset ; or, if an ink that acts like a paint instead of a dye is used, after many years it can be removed with an ordinary eraser. Safety and appearance both require the raised letters of the seal press. We recommend plain gothic letters for name and location of library, avoiding fancy types and border lines. (See *Library Notes*, p. 27, vol. 1.) Price, **\$4.50.**

26n2. Gelatine Stamp Pad. This is gelatinized ink, in a tin box with cover, and has one layer of thin fabric drawn over its surface. This is constantly kept moist with ink by absorption from the elastic cake, so that it is always ready to properly ink the face of a rubber stamp. In red, violet, blue, green, and black.

Price, $2\frac{1}{4} \times 3\frac{1}{2}$ in., 30c. ; $2\frac{3}{4} \times 4\frac{1}{2}$ in., 40c. ; $3\frac{1}{2} \times 6$ in., 60c.

26n3. Stamp Ink. For use in self-inking rubber stamps, and for re-inking. $\frac{1}{2}$ -oz. bottle, 15c. ; 1 oz., 25c. ; 2 oz., 40c.

The metal letters of the numbering machines require a special ink, which we furnish at 30c. per bottle.

We have every facility for furnishing any pattern of rubber or metal stamp, and in any form now made.

Book Supports.

Every library learns by sad experience how important a factor they are in preserving bindings, keeping the shelves sightly, and books upright. Every bookowner has trouble from books dropping over on their sides or tipping part way. Many modern books have covers so thin that they are little better than flexible leather or stiff paper, and unless braced they "squash down" as does an unsupported pamphlet. Every binder is largely indebted to the carelessness of bookowners in this respect. Books half tipped over soon have the threads broken, the binding is ruined, and must be replaced. If the threads are strong, the book may stand the strain, but become so warped that it can never be straightened. To avoid these evils, scores of devices have been made, tried, and rejected as not worthy adoption; unsatisfactory in working, unsightly on shelves, taking up room needed for books, heavy, bulky, clumsy, with springs constantly getting out of order, adapted to only one use or to only one thickness of shelf, and too expensive for wide use. The want has led to many efforts to supply it.

Our first book braces, copied from the Boston Public Library, were cubes of wood about 15 cm on each edge, and cut thru diagonally. These took much room, and were easily moved from lack of weight. After these came the pressed brick, covered with paper. This took less room and held the books better; but they were dropped and broken, or broke something else, including the toes of attendants, were clumsy on shelves and off, and would not hold up tall books. Some to this day use these bricks, and say that the space taken is not a strong objection, because if there is space on the shelf it makes no difference, and if there is no space, then the brace is unnecessary. They forget that when the shelf is filled the brick must be taken out and put *somewhere* to store it, and that two books will go anywhere that one brick can be put.

After successive experiments the supports now recommended by the Bureau were devised, and not only have to a very large extent replaced the crude forms in use, but in these improved patterns have been found such an economy as greatly to increase the general use of supports.

The three candidates for favor—the L. B., Crocker, and Buffalo—have individual merits, not common to all. For 8° volumes, the L. B. has the widest use, while for folios the Crocker will be found most effective. The Buffalo support's principle of action is much the same as the L. B., and has the advantage of not disappearing among the books, but the disadvantage of taking more space on a full shelf, of compelling the shelves to be grooved specially, and cannot be used to support books on counters and tables, as can the L. B. Each library will do well to test the different kinds for themselves. The Bureau offers sample lots for a month's trial.

28a. Old L. B. book support. This is the first of this form invented, and has been more widely used than all others combined. It takes no space on the shelves, an advantage, but has the disadvantage of not supporting tall books as well as 28b, which finds strength in the outward projection. It is preferable for table use.

Price, **10c.** each; **90c.** for ten; **\$7.50** per 100; **\$60.00** per 1000.

28b. New L. B. book support. A new and improved form of the L. B. the first satisfactory support devised. It serves not only for books on the shelves, but, two supports make a perfect temporary shelf on table, floor, or ledge—indeed, anywhere, of any desired length. This quality makes it the best support for office and home use; supplying a want often felt in every room where books are kept or handled.

Description. A single piece of light but strong metal is bent into a rectangular shape, thus forming a base plate and an upright. From the material composing the upright are formed two braces which are bent outwardly and at right angles to the upright itself. These projections brace the upright against lateral displacement and prevent it from being bent out of shape by the weight of heavy books, or crawling away from the books. The support cannot be hidden between books as in the old form and hence books cannot be pushed on the edge of an unseen support and so injured. It will support books of any size from the smallest to the largest.

Two distinct uses. Singly, the best known device to keep books upright on shelves. In pairs, the best adjustable shelf. Each support makes a firm end for the column of books between them.

Sample 100 sent on trial to any library, subject to return if not fully satisfactory.

Price, **12c.** each. **\$1.00** for 10. **\$9.00** for 100. **\$75.00** for 1000.

28c. Crocker Book Brace. The Crocker Library Book Brace is a plate of wood 8 cm wide, 1 cm thick, and 17 or 26 cm long, of beech, with edges rounded and surfaces nicely finished, so that nothing can injure the finest binding. A fine steel spring, attached by screws and nuts in a slot, is adjusted so that the length from tip of spring to foot of brace is just *one-half inch* more than the space between shelves where it is to be used. The foot of the brace is placed against the books with the spring outward. On raising it to a vertical position, the tips of the spring engage the under side of the shelf above, effectually preventing any forward thrust of the books. The spring is slightly curved, so that it is placed in position with perfect ease, allows the books to be removed in front of it without resistance, and can be moved toward the books to fill any spaces with the ease of an ordinary book. It holds the books firmly at the top, where a small force is so much more effective than a large one nearer the bottom, and supports with rigid resistance any column of books, even the tallest folio as firmly as it does an octavo, a thing impossible with any other brace on the market.

Prices for O and Q sizes, **15 cents** each: **\$1.35** for **10**; **\$12.00** for **100**. Extra long for folios over 35 cm (14 in.) high, **18 cents**. For 40 cm (16 in.) or 50 cm (20 in.), **20 cents** each.

28e. Buffalo Book Brace. Devised by J. N. Larned, Supt. of the Buffalo Library, Buffalo, N. Y. This support aims to avoid any possibility of turning on the shelf, sliding to the back, or disappearing between the books, by carrying a tongue under the books in a groove running the length of all the shelves. This is the latest candidate for favor, and, so far as it has been adopted, is highly commended.

Price, **28e** Buffalo Book Brace, **15c.** each; **\$1.35** for **10**; **\$12** per **100**.

28d. Wood Dummies. For indicating the locality of a book kept elsewhere than in its regular place. The label below is pasted on the side of a thin board, $12\frac{1}{2} \times 20 \times \frac{1}{2}$ cm ($5 \times 8 \times \frac{1}{4}$ in.), and when filled out gives the description of the book, and forms a permanent record of its actual location. The reason for its removal is shown by underlining on the slip the printed sentence which applies in the particular case. Price, **\$5.00** per 100.

Class	Book	Vols.	Size	Will be found
Author.....				
Title				
.....				
For the convenience of those consulting the shelves, this wood dummy represents a book not here, because:				
Too large for the regular shelves.				
Transferred to Reference Shelves.				
Costly or rare. Removed for safekeeping.				
Missing and not yet replaced.				
Made by LIBRARY BUREAU, 146 Franklin St., Boston.				

29a. Bracket Step and Handle. Instead of noisy, heavy, inconvenient, and often dangerous step-ladders, stools, etc., which are always under foot when not wanted and in the farthest corner when needed, our device is always in place, strong, efficient, cheap, noiseless, and never in the way. The Bracket Step is screwed firmly to the upright between shelves as high as needed to reach the top shelf, if not too high for a single step; i. e. 30 to 50 cm (12 to 20 in.) from floor. The handle is screwed above at full reach when standing on the floor. For very high shelves a second Step and Handle may be put above the first so to rise two steps. In use, the hand grasping the handle above and the foot on the step, the body is easily and safely raised so to reach 20 inches higher than from the floor. Ladies use them as readily as men. There is no exposure, and little strength is required. One hand is free to get or replace books, and the other balances the body and allows of reaching a shelf length either way. Beside its regular use for reaching books it is often invaluable where a door or window bolt, a gas jet, ventilator, or anything out of reach requires frequent adjustment.

29a1. Step, Handle, and strong screws complete, iron, japanned, **25c.**

29a2. Iron, gold bronzed **30c.**

Discount on 20, 10 per cent; on 100, 20 per cent.

For other devices for reaching high shelves, see folding steps No. 79

29c. Rubber Chair Tips. Indispensable in public reading-rooms.

A strong rubber tip or shoe, to fit the various sizes of chair legs, makes them noiseless, pleasanter to sit in because of the elasticity, and more durable because so much of the jar and strain is avoided by the rubber cushion. Once used no library will be without them. Most reading-rooms use No. 10 tip. A hole is bored in the chair leg and the solid tip inserted, instead of using the cap over the end.

Outside tips, **10c.** Inside, **5c.** each. **\$4.00** per 100. Special bit for boring chair legs, for **\$1.00.**

29s1. Cole Size Card. A simple size card for quick and accurate sizing. Parallel lines drawn at the proper distances, i. e. 10, 12½, 15, 17½, 20, 25, etc., cm, from the bottom indicate the outside limits of the height of each size in the symbols *Tc Tt T S D O*, etc. From the lower left-hand corner, three diagonal lines are drawn, which run at a uniform proportion from the edge of the card, and designate with mathematical accuracy the shapes of the books by the proper prefixes *nar*, *sq*, or *ob*. Place the left-hand edge of the card between the cover and the fly-leaves on a line with the bottom of the cover, which serves as an automatic guide to hold it in exact position, and the size and shape appear at once in the card above and at the right of the corner. The card is one of the most useful time-saving devices yet made for catalogers. Price, 25c. each.

29s2. Size Rule. A 30 cm boxwood metric rule on which are stamped the sizes of books as decided upon by a committee of the A. L. A. The size is given in both the new symbol, *Q*, *O*, *D*, *S*, and the corresponding fold designation, 4°, 8°, 12°, 16°. Price, 20c. each.

29x. Revolving Shelf Pin. The ordinary metal pin has the round part which fits in the hole in the upright and the flat part on which the shelf rests. In our pin the parts are connected by a piece standing at right angles to the first, thus allowing an adjustment to two heights, without removing the pin from the hole.

We have made many thousands of these for libraries, and they have been found a perfectly satisfactory shelf support. Used by the public libraries at Salem, Mass., Concord, Mass., Grand Rapids, Mich., Howard Memorial Library, New Orleans, La., New York State Library, Albany, and many others. We commend it as the most satisfactory low-priced shelf support made. Our own manufacture.

Price per 10, 15c.; per 100, \$1.00

29z. Table Fastener. An oblong piece of iron, for securely fastening the legs of the table to the floor, 2 mm thick, 5 cm long, and 2 cm wide. One-half the length is mortised into the table leg, and the remaining part screwed to the floor. This secures the table firmly. At least two are required—four are better—for each table. Price, 15c. per 10.

29u. L. B. Shelf Label Holder. After some years' experiment with a great variety of devices, we have perfected in material, size, angles, and clinging power a Label Holder for movable use on the shelves. A thin plate of heavy tin, neatly japanned, is cut by dies made for this special use, and so bent as to fit snugly the front edge, binding tightly upon the top and bottom of the shelf. On three sides of the front a narrow flange is turned up, so that a bristol card may be readily inserted, removed, or reversed. The plate, being perfectly flat, clings closely to the wood and holds its place. This holder is slipped under the first books on each topic, and, as the subject grows, is slid along, always marking the beginning. In the relative location now coming into general use, these Holders are almost indispensable. Labels nailed or screwed on the shelves are troublesome to move, disfigure the shelves, and do not mark accurately the beginning and ending of specific subjects. They are also largely used in stores for marking piles of paper, books, packages, etc., their application being almost unlimited. We also furnish a large variety of labels, printed on fine bristol board, fitting the Holders; e. g. the subject numbers and headings of the DECIMAL CLASSIFICATION, titles of the leading periodicals, and any label wanted in libraries. (See No. 37 L. B. Catalog.) The Holders are of two sizes, thus providing for both generic and specific labels, the large Holders showing the main divisions, while the small ones show the beginning of each section or subsection; e. g. 336 Finance could be printed in large type on the large label, while 336.2 Taxation could be in smaller type and on the small label.

PRICES

29u	L. B. Shelf Label Holder, labels $12\frac{1}{2} \times 2$ cm,	10c. each, \$7.50 per 100.
29v	" " " labels 5×2 cm,	10c. each, \$7.50 per 100.
	Blank cards accurately fitting the Holders, either size, per 100,	10 cents.

In ordering, the exact thickness of shelf must be given. Samples sent on application to Library Bureau.

A. L. A. Standard Accession-book.

First of all records to be filled, and by no means last in importance, is the book of accessions, the history of the growth of the library. To this the librarian turns for final reference in doubtful cases. Here is the complete story of each volume, fully told, but in the most compact form. It is the official indicator for the whole collection. Each line is a separate pigeonhole, in which, if not exactly the book, all the condensed facts about the book are placed. Thence they are never removed; they are not stolen, or loaned, or condemned, or withdrawn, or sent to the binder, or lost. The card is never misplaced, the entry does not mysteriously disappear, a new edition never supersedes. Once written, "it is enough," till the paper grows thin with wear and the binding crumbles with age or the ink-lines entirely fade out of ken. He may turn to his book of accessions to learn *what*, and *where*, and *when*, and *whence*, and *how much*, and feel sure of his answer. A well-made accession-book has an element of mathematical exactness unknown to any other catalog. It is the *editio princeps*.

Every volume has a line, and the book is thus an indicator for the entire collection. By this complete, unchangeable record the additions for every day, week, month, and year are shown at a glance; also the total number of volumes which the library has had; and its present number by subtracting the total withdrawn and lost. This book is the most permanent of library records. There is no danger of losing or misplacing entries, as sometimes happens in card catalogs, nor of being compelled to rewrite them, as often happens in the shelf list.

The name catalog should not be applied to the accession-book or to the shelf list, but is restricted to the author, title, and subject catalogs, made primarily for the use of readers, while these are chiefly for official use. Commonly "accession" is used also as an active verb. Some object to this, and prefer entry-book and "to enter;" or record-book and "to record" or register and "to enter." "To register" confuses with the registration of readers. Additions or addition-book and "to add" is perhaps best, as entry on this record is technically the only way to "add" a book.

For this essential book many forms have been used, but the best feat-

ures of all were finally combined in the A. L. A. Model, made by a committee of experts who compared thoroughly all the various forms collected, made and tested samples, and finally agreed on all the details of materials, ruling, printing, and binding.

The double page is divided by double lines into three groups. First on the left, after the date of addition, are the three numbers assigned by each library; viz., accession, class or shelf, and book, followed by the volume number. Next come author, title, and imprint entries, which belong alike to every book of the edition regardless of any library. Lastly come the notes of binding, source, cost, changes, loss, re-binding, sale, etc., this third group like the first pertaining solely to this copy and library: or in brief, the line is filled with the title, preceded by the special library numbers, and followed by the special library notes.

The desirability of the location number in the accession-book has never been questioned, but the frequent changes in that number as ordinarily used made its use impracticable. The best managed libraries now assign permanent numbers to their books, so that they may be called for from the oldest edition of the catalog as readily as from the latest. With such a system it is a great convenience to refer directly to the shelf where the book may be found without consulting intermediate catalogs, also to glance down the column of numbers and see in what proportion the various departments, as indicated by those numbers, are receiving additions. The decision of the A. L. A. Committee was unanimous in favor of these columns, for it is believed that every library will sooner or later adopt a relative location and so need them.

The old arrangement had the *volume column* with the other imprint entries on the second page. Here, the volume immediately precedes the author column, and at the first glance it is apparent what the entry is; e. g., v. 47, Harper's Magazine, is vastly more convenient than to follow across an entire page to the former place of the volume, with the attendant danger, both in entering and consulting, of getting on the line above or below, and thus making serious blunders. Practical use will convince those doubtful of the utility of the change. A still stronger reason is, that the volume-number is an essential part of the call-number or press-mark by which the book is found, and it is inconvenient to have the first part of this number at the beginning of the long line of entries, and the last part at the other end.

The colored lines help the eye in passing across the page, following one or two above or below, and thus avoiding the danger of getting off the line in crossing the fold.

31a. A. L. A. Standard Accession Book. Size, 35 x 30 cm (14 x 12 in.). Paper is the best ledger obtainable; ruling and printing the highest grade of work. The binding is the *best*, broad vellum bands, extra strong sewing, selected leather, gold fillets, etc., and extra durable patent back. To match sets, any other style bound promptly to order from sheets. Morocco has proved so much more durable that we catalog and recommend only that binding.

All these books have prefixed a descriptive and explanatory preface, with a full code of detailed rules for entering all kinds of books, maps, works of art, etc.

PRICES.

31a 1.	2,000 lines, half turkey morocco, with rules	\$3.75
31a 2.	5,000 " " " " " "	8.00
31a 3.	10,000 " " " " " "	13.00
31a 4.	1,000 " press-board covers " "	1.25
31a 5.	Unbound sheets, per 1,000 lines	1.00

Both A. L. A. Standard and the Condensed Accession Book are half numbered, that is with the units and tens printed consecutively thruout the book, without charge. Complete figures are obtained by prefixing the 100s and 1,000s, in ink or by numbering machine, at every fifth or tenth line, which are heavy guide lines across the double page. These can be read quicker than complete consecutive numbers, as the eye catches the prefixed figures and reads the remaining 2 at a glance.

We complete these numbers at 30c. per 1,000; i. e. it adds \$1.50 to the cost of a 5,000-line book to have the numbers 1-5,000 or 5,001-10,000 printed in, but it saves more than this in looks and legibility. This is one half the cost of full numbering, and vastly easier to read. No charge for lettering the name of the library on the binding.

Steel ledger clip for opening at exact place, saving much

wear from handling	\$.50
Box-wood A. L. A. Size Rule (see 29s2 L. B. Catalog)	.20
Cole Size Card, (see 29s1 L. B. Catalog)	.25
Heavy slip covers, fitted to any size, duck	1.25
" " " " leather	3.00

31b. Condensed Accession Book. Intended for use in private libraries, where it was found desirable to keep some record of the growth, source, and cost of the collection; it has grown into quite a formidable rival of the A. L. A. Standard among public libraries. The headings are given as on the larger book, but as the

page is narrower, the columns are narrower, hence the term condensed. The numbers are printed 25 on a page in series of 100, at the same cost as in A. L. A. Standard, printed with the last two figures without charge. The book is uniform in size and binding with the L. B. BINDING BOOK and ORDER BOOK, the page being 20x25 cm (8x10 in.). The paper and binding are of the same quality as in the A. L. A. Accession Book.

31b 1.	2,000 lines, half turkey morocco, with rules, etc.,	\$3.00
31b 2.	5,000 " " " " "	5.00
31b 4.	1,000 " press-board covers, " "	1.00
31b 5.	Unbound sheets, per 100 lines	.06

Shelf List.

Its importance and usefulness are illustrated by the following excerpts from an editorial in vol. 1, *Library Notes*:—

"Once each year the librarian reads the shelves with this list. As the two correspond, he has only to look at the book number and number of volumes, and identify each in its place on the shelves, or if any are missing, to record them. From this missing list he crosses those found to be properly charged or at the binders or satisfactorily accounted for, and the remainder is the annual list of books missing. By prompt attention it is often practicable to recover missing books, and no competent and faithful librarian will fail to have a careful inventory of the property committed to his charge made in this way each year. The objection to the ordinary blank book for this list is the impossibility of foretelling how rapidly subjects will be filled and the consequent certainty that, however carefully the pages may be assigned to the various subjects, the scheme will by and by break down and necessitate recopying the entire work. With the laced shelf sheets, whenever any page is filled a blank sheet is inserted, the proper order is perfectly maintained, and recopying is avoided. If, as often happens, in the constant handling of the list during the inventory, a sheet is torn or soiled, that single sheet can be replaced with a fresh one with trifling labor. The shelf list thus combines the advantages of the book and card forms, being kept in perfect order and capable of expansion and replacement quickly and cheaply as need may arise, and yet being handled and turned through the fingers as readily as an ordinary book.

. . . . As the great majority of libraries are arranged with more or less minuteness according to subjects, in the same proportion the shelf list is practically a subject catalog in book form and in practice is constantly referred to by those who have access to it. While its real purpose is

for inventory, it is hardly less important in many cases as a guide to subjects; and, if one chooses to insert cross references and notes in a different colored ink, it can be made an admirable help to readers wherever books are closely classified by any of the relative systems."

311. Shelf List. This is a brief inventory of everything on the library shelves, and is simply indispensable. It is the guide in all examinations, serves to keep books in proper place, shows any absences, and is a check on theft as well as misplacement.

As the books are shelved by subjects, the Shelf List is a brief Subject Catalog, and in use is found of the *greatest practical value*. While it may be made in various forms and sizes, that recommended by the Am. Library Association has been found most convenient, and is largely taking the place of other forms. It is 20 x 25 cm (8 x 10 in.), ruled with a double head line and 25 cross lines, so that each sheet holds on the two pages 50 books. Columns are ruled for Book No. (2 cm), Accession No. (3 cm), Vol. No. (1 cm), Author (4 cm), and brief title (9 cm), with 1 cm margin for binding.

As the Shelf List is in all systems most liable to be altered or worn out, it is very undesirable to bind it in the usual way; and the Shelf Binder has proved a useful invention for binding quickly, strongly, and yet so that any needed changes can be easily made. The sheets are all perforated exactly alike by machinery, and thru these holes the binding cord or flexible steel is passed. The volume may contain from 1 to 200 sheets, is as strong and convenient as an ordinary book, and yet in a moment any sheet may be removed or a new one inserted without injury. The great practical convenience of this system of perforated sheets and shelf binders has led to its wide adoption for a great many other uses. We now make in various sizes, rulings, and qualities for many other purposes. For the Shelf List proper, however, the standard 20 x 25 cm size is so much used that it only is kept in full stock ready ruled and printed with the proper heads.

These sheets, 20 x 25 cm (8 x 10 in.), are ruled from the best linen ledger paper (1125, see No. 53), and punched with two holes, 15 cm apart, to fit the Shelf List Binder, and with printed headings are 75c. per 100; 60c. per 100 without. Special Binder, \$1.10.

To match old style of binders or any variation from this standard punching or ruling, send sample sheet with order.

Shelf List Binders. The C. S., Emerson, Universal and Spring-back are made in an extra strong and durable binder to fit and specially for, these sheets.

The C. S. and Spring-back (the latter binds without perforating) have the largest use for this special purpose.

Price, any style of binder named above, \$1.10 each.

31j. New York Shelf List. The only objection to the Standard A. L. A. Shelf List is that in close classification, either so many sheets must be used as to make the Shelf List bulky, or, if more than one subject is put on the same sheet, it sooner or later fills up, and has to be recopied. This has led to the adoption by the New York State Library, whose director was the original deviser of the standard sheet, which has come into such extensive use, of what we call the New York Shelf Sheet. This gives a line 25 cm instead of 20 cm long, with extra space for author, title, and numbers; but the other way, instead of 25 cm it is only 10. These sheets laced into binder make a Shelf List like a pocket check book. It handles easily, and the sheets, being so small, one can be afforded for every topic, even in the closest classification, thus avoiding needless recopying. This form was unanimously adopted by the Faculty of the Library School, as best for the New York State Library, where books are closely classed on the shelves. Price, per 100 sheets, linen ledger paper 25 x 10 cm, ruled, printed, and punched, 50c.

Special one-half morocco binder, to fit in the C. S. style or Spring-back, 90c.

32l. Shelf list cards. By using cards the entries of new books added can be inserted in the exact place, and recopying is no longer necessary. 32l cards in white or colors are the *most desirable* in size and weight. Price, \$1.60 per 1,000.

31r. Day and Serial Blanks. The Day Blank is ruled and printed to give a blank space for every day in the year. The months are printed at the top of the columns, and the days at the left, with lines at side and bottom for footings and notes. Ruled and printed on both sides and punched for the L. B. Shelf Binder. Another style is printed with columns for half yearly and yearly summaries. The Serial Blank has columns and headings for title, list price, cost, date of order, and from whom. This used with Day Blanks on either side makes a record for 64 serials for two years. The Day Blank is much used for statistics, etc.

Price per ten for either day or serial blanks: ledger paper, 25c.; by the 100, 20 per cent. discount.

L. B. Order Books, Sheets and Slips. [See No. 35u and 35v for description and prices of Slips and Sheets.] These have been perfected with great care, and together make an ideal order system. Each of the three parts is used largely by itself, and in combination, for various purposes. The most approved plan is to use the Slips for recommendation blanks, to submit these to the committee, and to copy in the Order Book those voted, and then to arrange these with the

other unfilled orders in the alphabetical Order Index. When an order is to be sent, the List in the Order Book is copied on an Order Sheet which is an exact duplicate in size, headings, numbers, etc., and this goes to the agent. All correspondence, reports, bills, etc., fully identify the exact item by simply giving the consecutive number which is on Slip, Book, Sheet, and, when they come, on book and bill. The Index shows at a glance if any book is ordered. The Book preserves, without danger of loss or disarrangement, the complete list in chronological order. The file of slips of books received tells price, date, agent, person recommending, etc.; in short, in practice this system is found to answer all the questions in the cheapest and most direct way. Samples of Slips and Sheet will be sent libraries wishing to consider the adoption of the system.

31u. L. B. Order Book. An essential part of the order system. In best Turkey morocco binding, linen ledger paper, and corresponds in quality and rulings to the condensed Accession Book (see No. 31b). It has special columns and printed headings for Order No., Author, Title, Place, Publisher, Year, Vol., Size, Binding, Agent or Book-seller, List-price, Net-price, Date Rec'd, Date Ordered, Remarks, etc. It is so arranged as to record with the least labor all the items about each book bo't, and becomes one of the most important record books in the library. See Order Slip and Sheet No. 35u and 35v. Printed with "half numbers" on each line free; fully numbered, 30c. per 1,000 lines extra.

PRICE

31u1.	2,000 lines, ½ Turkey morocco binding	\$2.50
31u2.	5,000 " " " " "	4.50

31v. Register of borrowers. Uniform with Order and Binding Books, ruled and printed with headings for no., name, and residence, and half printed numbers at the left-hand margin of the 25 lines to each page.

For recording borrowers' names and assigning them numbers in accession order, which numbers are used on borrowers' cards and in charging loans. **31v1**, 1,000 line register, ½ russia. **\$1.75.** **31v2**, 2,000 line register, ½ morocco, **\$2 50.**

31x. Binding Book. For recording in consecutive order the volumes sent to the bindery, and assigning the binding number. This order to the binder is made on an L. B. Binding Slip (see 35x) for each volume, and is a copy of the one-line entry in this book. Made on linen ledger paper, with special rulings and headings for Binding

No., Lettering, Material, Color, Size, Vols., Price, Total Price, Library No., Date sent, Date returned, Binder, and Remarks.

31x1.	1,000 line, press board covers		\$.75
31x2.	2,000 " $\frac{1}{2}$ Turkey morocco		2.50
31x3.	5,000 " " " "		4.50

Sole makers, Library Bureau, 146 Franklin St., Boston.

32 and 33. Catalog Cards. The importance of having these of good material to withstand wear and give the best possible surface for writing and erasure, and the still greater necessity that they be made with the utmost nicety, is explained in their description under Card Index Outfits. (No. 22, p. 34 to 38.) We cannot urge these points too strongly, even tho an inferior stock be used for cards not often consulted.

If cheaper cards are wanted, there is the same reason for buying of the Bureau as in the higher grades. All of our cards, of whatever grade, have the same exactness in ruling, cutting, and punching. This result can only be obtained by methods and machinery devised by us for this special purpose.

No. 22 describes only standard cards suited for outfits. Here under their individual catalog numbers are other grades and forms for which we have found need during 15 years. Any other size of ruling or printing will be made to order. Samples on application.

d. A good writing paper used mostly for printers' copy or temporary indexes. Not strong enough for permanent use, nor thick enough to be consulted easily.

h. The heavy linen ledger used for library blanks and books. Much used in private lists, or where economy of space is necessary. An excellent surface for writing, but too thin for quick handling. Made in white only.

Price, per 1,000

See p. 27 to 31 for description and list of L. B. Standard Cards in connection with Card Index Outfits, instead of here in the numerical order of catalog.

Beside the standard cards cataloged above, we have forms for special uses, as shown in the Library School Card Catalog Rules. They are a material aid in quick reference to desired matter in the library catalog, indicating, both by printing and color of card, the nature of the entry. We commend these to all seeking the most useful catalogs. Rules for sample cards illustrating their use are in the Library School Catalog Rules.

32m1. Biography cross reference cards, printed as below on *green bristol*, matching "1" stock, ruled with standard ruling. Price, \$2.25 per 1,000.

	For valuable matter bearing on this subject see Biography of	
Among other lives	note specially:—	
Call number	Life of	By

33m1. Same as 32m1, 33 size. \$3.00 per 1,000.

32m2. Criticism card. Printed on "1" buff, with heading, "For criticism of." Price, \$2.25 per 1,000.

33m2. Same on the larger card, \$3.00.

32m3. Biography card. With heading printed on *green bristol*, "For biography of." Price, \$2.25 per 1,000.

33m3. Same as 32m3 on the larger card. Price, \$3.00 per 1,000.

32m4. Bibliography card. Printed on "1" *blue*, "For bibliography of." Price, \$2.25 per 1,000.

33m4. Same as 32m3 in the larger size. Price, \$3.00 per 1,000.

All the above cards are ruled and punched. Samples sent on application.

33m5. Arrangement cards are cut 8 cm wide to project $\frac{1}{2}$ cm above the others. Plain white bristol printed with the following note:—

Cards on this subject stand in this order:— Bibliographical (blue cards); Biographical (green); General works (white); Special topics (white); alphabeted by words on top line, in red ink, as follows:—

Price, \$4.00 per 1,000.

33m6. Best books card. As below, printed on plain blue bristol, cut to stand 2 mm. above the others, so the eye recognizes them without turning. \$2.50 per 1,000.

For popular treatises see :—

Size, 8 x 12½ cm.

32m7. Same as 33m7 on smaller card. Price, \$3.00 per 1,000.

34a. Charging Cards. See Charging Systems, Catalog No. 25a.

34b. Call Slips. See Charging Systems, Catalog No. 25a.

35u. L. B. Order Slip. An almost necessary companion of the Order Book (see 31u), also the best recommendation blank. Standard 33 size 7½ x 12½ cm, manilla color, blank spaces with printed headings and rulings for all the items of the fullest catalog and all the official library records. Used also by individuals for card catalogs, lists of books to be bought or read, by agents to make offers of special books for sale, etc., etc. One of the greatest helps in keeping records and accounts. Space is allowed for printing the name of the library at the top, a great convenience when slips are sent to the purchasing agent. This costs **50c.** per 1,000 extra.

Price, No. 35u L. B. Order Slip, **\$2.00** per 1,000. Discount 10 per cent on 5,000; and 20 per cent on 10,000 in one order.

other side directions are explicitly given by marking circles round the color, leather, size, etc., wanted. Space is given for added special directions below. The price per volume, and total, guard against mistakes, and the number refers to the Binding Book, where, in proper column, all these facts are recorded. This slip projects from each book (or first volume of each set) when sent to the binder, and stays in it till the book is done, so that no workman has any excuse for mistakes, complete directions being before him constantly. This has proved both to librarian and binder a most satisfactory Blank.

Price, No. 35x, L. B.

Binding Slip, 25c. per 100 ; \$2.00 per 1,000.

35y. L. B. Binding Sheet. These, like the Order Sheets, are the unbound sheets of the Binding Book. (See No. 31x.) For use in sending to the binder instead of the Binding Slips, if preferred, or for the use of individuals who, not caring for a bound book, use the loose sheets instead.

Price, 35y, Binding Sheets, on ledger paper, per 100, \$2.50.

35v. L. B. order sheet. This is 25 x 40 cm, an exact duplicate of the sheets bound up in the Order Book (31u). Used to forward to the agent exact copies of the Order Book. A sheet partly filled is cut on the line, and the next list sent begins where the last ended. Thus the agent, keeping his Order sheets in a binder or scrap book, has a duplicate Order Book.

Price, No 35w, ledger paper, printed both sides, per 100, \$2.50.

36a-b. Book covers. It is conceded by the majority of lending libraries that the advantages of using covers for books in circulation are not sufficient to compensate for their cost. There are some, particularly among the older libraries, who do not accept this view, but follow the custom established with their library of covering all books circulated out of the building. For these and for the smaller, individual use, we offer the following:—

36a. Adjustable book cover. Made of manilla paper in 4 pieces, ready gummed, which can be adjusted to any book.

Size A fits 18mo to 12mo	\$1.50 per 100
B " large 8vo	2.00 "
C " geographies or 4to	3.00 "

36b. One piece cover. Made of strong manilla, self-sealing, and easily adjusted. Can be changed from one book to another of the same size.

Size A fits 32mo to 8vo	\$1.75 per 100
B " large 8vo	2.25 "
C " geographies	3.25 "

We also offer plain paper cut in sizes to order. Discount for large quantity.

37a-d. Printed Shelf Labels. These are mainly the headings of the Decimal Classification, printed on small cards, fitting the movable L. B. Shelf Label Holders (No. 29u). The principal topics or main divisions are printed on 2 x 12½ cm cards, the subdivisions on 2 x 5 cm. Four series are offered:—

37a. Set of 100, covering the D. C. "Divisions," the 10 "classes" being made distinctive by the use of blue ink. Price, \$2.00 for the set.

37b. The most used headings of the "1,000 sections" of the D. C., thus,—

942

HISTORY. Europe.

ENGLAND.

Price for the set, \$10.00.

37c. 520 labels, 2 x 5 cm, covering subdivisions of the 1,000 sections of the D. C., that are often large enough to require marking.

942.02 ENGLAND
NORMAN

Price per set, \$6.00.

37d. Beside the D. C. labels above, we have printed a miscellaneous list of 65, that finds acceptance in every library, whether classed on the decimal system or not. They cover names of all the states and territories, days of the week, and the following :—

Accession.	Card.	Do not Handle,	Private Books,	Reserved.
Bindery,	Classify.	Duplicates,	Revise,	

Price per set, 50c.

37i.

37g.

37j.

37h.

These labels are also put up in book form, perforated—25 sheets, 12 x 22 cm, to a book.

Book of size 37g contains 500 labels.

"	"	"	37h	"	750	"
"	"	"	37i	"	750	"
"	"	"	37j	"	1050	"

Price per book 25c.

37g-j. Gummed Labels. For numbering backs of books with class and book number. These afford the cheapest and most effective means of marking the backs of books, except for a binder to letter direct on the binding. The adhesive quality of these labels is the best known. Printed with red border, or perfectly plain.

Put up in cartons of 12 small boxes, 75c. per carton, 10c. per small box. In bulk, 5,000 in a box, price :

37g.	\$2.50	per box.	37i,	\$2.00	per box.
37h,	2.25	" "	37j,	1.75	" "

**38a. Brass Letters and Num-**

bers. Used in marking sections, cases, alcoves, localities in a room, etc., thus greatly facilitating reference to place. Handsomely finished in polished lacquered brass, the edges beveled and finished like face instead of rough edge, as usually made. On the wall they retain an ornamental appearance, quite different from the soiled, botchy look that printed or painted numbers rapidly assume. A discount of 20 per cent. is allowed on 20 or more.

$1\frac{1}{2}$ cm ($\frac{1}{2}$ in.) in height, 8c. each. | $1\frac{1}{2}$ cm ($\frac{1}{2}$ in.) in height, 15c. each. | $7\frac{1}{2}$ cm (3 in.) in height, 35c. each.
 $2\frac{1}{2}$ " (1 in.) " 10c. " | 5 " (2 in.) " 25c. " | 10 " (4 in.) " 40c. "

38b. Van Everen Library Numbers. Perforated and gummed like postage stamps; a very satisfactory device for numbering the backs of books. The larger size of numbers can be used to advantage, with a label, for numbering the shelves or the classes.

6245 38b1. Numbers of this size are printed one hundred on a sheet, from 1 to 10,000. Any 1,000 numbers may be ordered at 50c. Sheet of six alphabets, 3c. Each number of this size from number 1 to 1,000 is also sold separately; that is, 100 of each number put up in small envelopes. By this plan 100 of number 1, or any other number from 1 to 1,000, can be supplied at 10c. per 100. For a large quantity, the price is much less.

252

II

38b2. Three-eighths figure printed one hundred on a sheet from 1 to 2,000. For numbers below 2,000 this is the most convenient size. Price, 50c. per 1,000 numbers. Sheet of four alphabets, 3c.

285

B

38b3. Half-inch figure from 1 to 5,000, black. Price, \$1.00 per 1,000 numbers. Sheet of two alphabets, 3c.

325

21

38b4. Three quarter-inch figures from 1 to 1,000. Price, \$1.00 per 1,000 numbers.

121

38b5. Inch figure from 1 to 500. Price, 20c. per 100. Alphabets, 3c. each.

S

39a. Adhesive Paper. For mending torn leaves, bank bills, engravings, maps, letters, manuscripts, or strengthening weak places or wrinkles in paper. It is transparent, so that print can easily be read through it. Price, per package of 24 sheets, $3\frac{1}{2}$ x $6\frac{1}{4}$ in., \$1.00; per 10 sheets, 9 x 14 in., \$1.00; 14 x 18 in., \$1.75; 19 x 29 in., \$3.00.

39b. Adhesive Cloth. For repairing backs of books and covers, worn music, etc. Price, \$1.50 per square yard.

39c1. The Acme Pocket. See Charging Systems, Cat. No. 25a.

39c2. C. C. Pocket. See Charging Systems, Cat. No. 25a.

EMERSON'S BINDER

CAT. JULY 7, 1885. NO. ISSUED SEPTEMBER 12, 1887. 1885-1887

DESCRIPTION.
This Binder is externally precisely like the cover of a bound book. Its peculiar device for self-binding in firm-
sides of two narrow strips of cloth, like as do the links, of the back-band strip contains eyelet-holes through the
front of the back-band strip, and the eyelet-holes of the
which heavily threaded needles are inserted in the back
papers and strips, and are firmly secured to the
"cleats" by a cable back, adjusters held in a vise, quite
as firmly and neatly as if bound regularly.

PRICE-LIST

No. Binder.	A size of the leading publications, etc., for which the binder is adapted.	Size of Binder.	Cloth and Paper.	Cloth.	Leather and Cloth.

OFFICIAL POSTAL GUIDE.

42a. Common Sense Binder. This candidate for first place has made friends wherever tried, and grown into very large use with unexampled rapidity. After long experience we commend it highly. Two metal strips, hinges, or stubs make a vise in which pamphlets or papers are clamped by flexible, flat, steel fasteners, attached to the right-hand stub, as securely as if bound. This fastener is stiff enough to perforate thin pamphlets without previous punching, so flexible that it can be bent at any point with the fingers, and so strong that it may be bent back and forth in constant use for many years without breaking. It breaks less often than any other device, and can be replaced as quickly as a common cord. This fastener is passed through the papers between the stubs, which are held firmly together till it is bent over as close as possible, thus clamping them together. The free end of the fastener is then protected by sliding the brass clasp over it, as shown in the cut. The binder is simple, durable, and common sense.

The steel fastener cannot stretch, thus cutting the papers by a saw-like action. They clamp by a right-angle bend in the steel, and so cannot slip in fastening, or work loose in use. The quickness of the operation allows frequent removal of any paper, piece of music, etc., often a great convenience when a single sheet is wanted and a whole volume cannot be carried.

Beside the styles and sizes kept constantly in stock, we make any size or material promptly to order.

In ordering from the following sizes, allow $\frac{1}{2}$ cm margin all round; i. e. order a binder 1 cm ($\frac{3}{8}$ in.) longer and $\frac{1}{2}$ cm ($\frac{3}{16}$ in.) wider than paper.

Address all orders to Library Bureau, 146 Franklin St. (P. O. Box 260), Boston.

44i. L. B. Scrap Book. One hundred manilla sheets with guards, laced in a Common Sense Binder. On these sheets the scraps may be pasted, and by the insertion of new sheets the clippings on any subject can always be kept together. These manilla sheets and shelf binders make the most practical scrap book yet invented, combining in the fullest degree the merits of the old system of pasting on a large flat sheet, for easy reading, with the greater advantage of constant classification, power of revision, and easy consultation.

Price, half morocco, Binder and 100 manilla sheets with guards, **\$1.50**. The Manila scrap sheets can be had, cut and punched to same standard, 20 x 25 cm, **25c.** per 100.

44a. The L. B. Scrap Box. One hundred manilla pocket-books arranged in a heavy case, alfabetically or by subject numbers, thus being their own index. With it scraps may be classed by any system and found again at once. Not being pasted, any can be taken out for use, to replace by better copies, or to throw away after their season of interest has passed. This system has great advantage over any method of pasting. The subject is entered on the pocket and in the index. Any illustrations or notes, as thought of, heard or clipped from papers, are added. All being unpasted can be arranged or re-arranged for any purpose, and in making up sermons, articles, etc., those parts needed can be used without copying. A thin book index serves for analysis and extra cross references beyond those on the pockets. This box holds twice as many scraps as Breed's Book, looks neatly on the shelf, and allows any one subject pocket to be taken away when wanted without taking the other 99. Numbers, letters, months and days on ready-gummed slips like p. o. stamps and a book-index go free with the L. B. Scrap Box. Price \$2.50.

44b. Breed's Portfolio Scrap Book. A series of 50 very strong manilla pockets, 15 x 23 cm (6 x 9 in.), firmly bound in red or black leather, making a handsome octavo volume. The material can be arranged alphabetically, as there is an alphabetical index in the front; or, as the envelopes are numbered, the notes and clippings can be easily classed according to the Decimal Classification, which is coming into such extensive use for this purpose. (See No. 12 L. B. Catalog.) The pockets are all provided with tucks, so that it is impossible for the clippings to fall out and get lost, even tho the book should be dropped on the floor. The binding is first-class, and well calculated to endure constant handling. The numerous guards in the volume leave plenty of room for expansion without straining the back, breaking the sewing, or warping the covers. This has many of the advantages of the Utility Scrap Book and L. B. Scrap Box, and can be placed on the shelf with the other books of the library. Price, half russia, \$3.00.

44u. Utility Scrap Book. A series of strong manilla pockets, lettered and bound, with space for expansion between each group of five pockets, which, lettered with the vowels *a, e, i, o, u*, make in all 120 pockets. The scrap or note is placed on the page of the initial letter of its subject and in the pocket of the first vowel in the subject; i. e. a scrap on "Character" goes on page C, in pocket *a*; on "Music" in pocket *u* of page M. The pages lie close together when empty. The book expands as more space is needed, and its capacity is five or six times that of an ordinary scrap book of the same size.

No paste, mucilage, strings, springs, or pins are used. The whole collection is instantly self-indexed under subject, and ready for reference. All scraps are simply laid loosely in their proper compartment, and any individual clipping can be taken out and used without affecting the classification of the rest.

The Utility is at once an index rerum and commonplace book. Write abstracts or quotations on slips with references to volume and page. Thus an account is kept of what is serviceable in one's reading.

If items on one subject accumulate, file away in a large envelope, and refer to it in the scrap book; this makes needed room and keeps track of all accumulated matter.

Both sides of printed sheets are preserved. Fold long articles to the length of 20 cm (8 in.), to fit the pocket.

When the book is full it is a valuable cyclopædia of those things in which the collector is chiefly interested. Another copy is started for current collections; or the matter may be taken out of the first and filed in envelopes, and the same scrap book used to collect a new supply.

Price, handsomely bound in half leather **\$1.00**

45a. Clacher Patent Pamphlet Box. By far the best and most durable case for filing safely, conveniently, and cheaply all pamphlets, periodicals, music, or any papers that need to be kept for quick reference, free from dust, wear, and injury. It is a handsome, strong wooden box with marbled sides and top, and cloth back with gold lines.

A strong concealed spring hinge of the best English wire automatically shuts and holds the cover dust tight. In use the ordinary case must be taken from the shelf, the dusty cover taken off the top, and the contents emptied out to find what is wanted. It takes time, and stirs up dust and contents. With this box the back of the wooden "book" opens like a spring door, without latch or catch. A wooden slide in the bottom of the box acts as a car to carry the pamphlets. Drawn out it holds the spring door open during consultation, and the pressure of the finger on the slide replaces the contents and shuts the box again, all without removing the case from the shelf. There is no other device that keeps the contents so accessibly. Inside the door is a blank index, so arranged as to be written on conveniently, and in all details the box is all that could be desired. The following are always in stock; we make to order any other size or finish.

45m-o. C. C. Pamflet Cases. This series of manilla and wood are as much the best of all the cheap cases, as are the unequaled Clacher of the higher priced. When the latter cannot be afforded, some years'

trial in many different libraries has proved these the most perfect and economical device. Cost is so low that they can be used with great freedom.

These cases have solid tops, avoiding the injury to pamphlets and the extra dust and dirt of the open-end patterns. They have nothing to get out of order, being merely handsome cases open on the back. Standing on the shelves, this form is least exposed to dust; and, if the case be pushed against the back of the shelf, it acts like a dust cover.

Made in all the standard sizes. Special sizes made promptly to order at proportionate rates. The regular stock is in different thicknesses: 1. The manilla case for a few thin pamphlets. 2. The half thickness. 3. The standard. This avoids the waste of shelf space and the crumpling down of the pamphlets occasioned where the thick cases must be used, tho there are few pamphlets on the subject. If the collection increase, it is very easy to replace either of the thinner cases with a thicker one, and change the labels, extra labels being furnished for this purpose.

Manilla C. C. Pamflet Cases. Made from heavy tag-board to take a few thin pamphlets.

45m. 1. Size 25 x 17.5 cm (10 x 7 in.). Price 3c.
45m. 2. " 31 x 20.5 " (12 x 8 "). " 4c.

Wood C. C. Pamflet Cases. Thoroughly seasoned stock, joined in the strongest way, all neatly covered with very durable marbled paper.

45-o 3. Size 25 x 17.5 x 3 cm (10 x 7 x 1¼ in.). Price . . . 15c.
45-o 4. " 25 x 17.5 x 6 " (10 x 7 x 2½ "). " . . . 20c.
45-o 5. " 25 x 17.5 x 10 " (10 x 7 x 4 "). " . . . 25c.
45-o 6. " 26 x 17.5 x 7 " (10¼ x 7 x 2¾ in.). " . . . 20c.
45-o 7. " 27.5 x 18.5 x 4.5 cm (11 x 7½ x 1¾ in.). Price . . . 20c.
45-o 8. " 27.5 x 18.5 x 7.5 " (11 x 7½ x 3 "). " . . . 25c.
45-o 8a. " 27.5 x 18.5 x 10 " (11 x 7½ x 4 "). " . . . 30c.
45-o 9. " 30 x 22.5 x 9 " (12 x 9 x 3½ "). " . . . 30c.
45-o 10. " 35 x 25 x 10.5 " (14 x 10 x 4¼ "). " . . . 35c.

A discount of 20 per cent on 10 or more cases.

These dimensions are all outside. The inside measures are approximately 1 cm less in the wood cases.

46a. Spring-back Binder.

The papers or pamphlets are held firmly in a vise made by the steel cylinder spring back. No awl, needle, or string is used. The sides serve as levers to open this cylinder, which holds one sheet firmly or may be opened to hold a volume. The best device for keeping clean and in order any papers not to be mutilated by the needles of the ordinary binders.

This has led to a large use in reading-rooms for papers with double-page illustrations; there is no perforation or mutilation, and papers are preserved in a perfect condition for permanent binding. The chief advantage, however, is the ease and quickness with which papers can be taken out or inserted.

Also as a reading-case. The steel cylinder fits the hand and supports the pamphlet so it is vastly easier to hold while reading. The sides keep it flat and clean, and prevent the otherwise inevitable dogearing of the corners. It is the work of an instant only to put in or take out. Thus a magazine or part of a choice book appearing in numbers may be read by a whole family without hurting its appearance one fifth as much as would a single reader without the spring-back case.

All binders in list below have roan back and corners. We make promptly to order any other size or style of binding. In ordering sizes not on our list, give exact size of paper to be bound. For oblong books specify shape. Lettering title on front cover is at actual extra cost.

46n1. The Athenæum Newspaper File. The file consists of a centre stick, around which are arranged seven smaller sticks kept in place by the rubber handle at the bottom, and a common rubber umbrella

ring at the top. Each one of the smaller sticks binds the middle of each paper against the other sticks, holding it securely and keeping it separate from the other papers.

Fig. 1 represents this file filled with papers. Fig. 2 shows about the usual condition of papers in many other styles of files in which pins or spurs are depended on for holding the papers in position. Fig. 3 is a diagram showing the end of the file and the group of seven small rods surrounding the central rod, each small rod holding one paper. Without threads, needles, spurs or metal strips this file binds securely, holds the papers consecutively, and is one of the simplest files manufactured.

No. 1, length, 48 in. to fit papers up to 38 in.

2, " 40 " " " 30 "

2½, " 36 " " " 26 "

3, " 32 " " " 22 "

PRICE PER TEN, \$6.00.

For racks see 78n.

46n6. The Common Sense Newspaper Holder, constructed by attaching the steel fixtures of the Common Sense Binder to rods of the required length. It binds the pages of each paper in consecutive order; combines all the advantages of the binder; is simple, durable, and *common sense*, and is very widely used.

Sizes, 16, 18, 21, 24, 26, 28, 30, and 34 in.

PRICE PER TEN, \$6.00.

46n8. Atwater Newspaper Files. These have had a wider use among Y. M. C. A. reading-rooms, hotels, and club rooms than any other style, on account of the low price. It is simply two sticks held together by strong rubber rings, and in place by two pins. The papers are astride the longer stick, and kept from slipping off by the pins and the second stick. A practical cheap file.

It does not file consecutively. Price per 10 :—

47a-f. Interchangeable Pigeon-Hole Cases. The demand for Danner Cases with one or more spaces filled with pigeon-holes led to this device. They exactly fit the spaces of a standard revolving book case, and furnish not only for them, compartments for all standard blanks from a postal card to a foolscap sheet, but are equally convenient for the same use on shelves, tables, desks, or elsewhere. All are same height and width, one above another they match; side by side, the tops are a level surface, and so are interchangeable. Thousands have been sold. They are made in oak only, handsomely finished. To enable them to stand side by side closely, as well as to go in the Danner, all are made without top moulding. All cases are 25 cm high and 35 cm wide ($9\frac{3}{4} \times 13\frac{3}{4}$ in.) outside. The cuts below show arrangement. Any other size or form will be made to order. Designed to hold standard library sizes: P. size $7\frac{1}{2} \times 12\frac{1}{2}$ cm (approximately) 3×5 inches; note size $12\frac{1}{2} \times 20$ cm (approximately) 5×8 inches; letter size 20×25 cm (approximately) 8×10 inches.

Price, \$2.50 each.

47a. 20 boxes, $12\frac{1}{2}$ cm deep, 4 high and 8 wide ($5 \times 1\frac{1}{2} \times 3\frac{1}{4}$ in.). Made to fit postals, No. 33 catalog cards, and small envelopes.

47b. 15 boxes, 15 cm deep, 4 high and 11 wide ($6 \times 1\frac{1}{2} \times 4\frac{1}{4}$ in.), for billet size papers, tracts, envelopes, and folded papers.

47c. 12 boxes, 20 cm deep, 5 high and 11 wide ($8 \times 2 \times 4\frac{1}{4}$ in.), fitting legal envelopes, leases, insurance policies, and all the larger standard folded blanks and legal documents. This is one of the most used cases.

47d. 10 spaces fitting pamphlets, mss. and note size papers, circulars, etc. Each space is 20 cm deep, 4 high and 16 wide ($8 \times 1\frac{1}{4} \times 6\frac{1}{4}$ in.).

47e gives 1 space for cap, 2 for letter size papers, 2 for pamphlets or mss., 2 for note, 2 for folded papers, postals, or small envelopes, and 1 small space for pencils, eraser, etc.

47f gives 4 spaces for letter paper, 2 for note, and 2 for legal envelopes or folded blanks. “e” and “f” have the largest sale.

47l-n. Pigeon-Hole Cases. Same woods and finish, but smaller than 47a-f. Price, \$2.00 each.

47l. Made to fit standard letter size papers, like shelf sheets, order sheets folded, and the various library blanks. Each space is 20 cm deep, 26 wide and 4 high ($8 \times 10\frac{1}{2} \times 1\frac{1}{4}$ in.).

47n gives 10 spaces, $13\frac{1}{2}$ cm wide, 20 deep and 4 high, for standard note sheets. Also used for large envelopes, circulars, etc. “l” and “n” are made in oak, walnut, or cherry.

48a-p. L. B. File and Pamflet Case. The result of years of experiment to get a satisfactory file or pamphlet case at low cost. Half of one side doubles back on itself, allowing the most convenient possible consultation of contents without removing from the box. The thickness allows the left hand easily to hold the case with the door and flap open,

while the right is free to turn the index leaves and select just what is wanted. This makes consultation much easier, as no shelf or table room is needed; in fact, users of the case for convenience will take it from a table and hold it in the left hand.

Made of heavy board, covered with a highly glazed mottled paper, which wears without thread or ravelling, as cloth does not.

We heartily commend these cases for keeping all papers, pamphlets, clippings, or other matter to be arranged alfabetically, numerically, chronologically, or otherwise.

As a Pamflet Case. It is dust tight, opens quickly for easy access to contents, while it does not spill if carelessly handled. The cases go on edge, book fashion, on a common shelf.

As a Letter File. A large sale of these cases is for files for letters, bills, and various papers. For single files for a small correspondence these are handiest and cheapest. With combination indexes, they often take the place of filing cabinets. Separate cases for each subject are inexpensive and wonderfully convenient. Patrons who order one case on trial, almost invariably find uses for many more.

Expansive Indexes. We make various alphabetical and numerical indexes exactly fitting the different sizes of boxes. The main sale

for letter files is size "g;" for this we furnish, beside the above, indexes in sets of 2, 5, 10, or 20, covering a single alfabet, giving the close and carefully devised subdivisions of expensive cabinets; i. e. 10 g boxes with a 10-section index give the capacity of a 10-file cabinet

at a cost of \$4.00. When the boxes are filled, they are replaced with new ones at less than the usual cost of transfer cases.

For all sizes, A to Z indexes, numerical indexes (25 numbers in a set), and blank ones to be written upon, are furnished at the same price as the box. (See list below.)

As a Newspaper File. The larger sizes are an excellent device for keeping files of papers clean for quick reference. The very large sheets are best folded once or twice. The smaller ones like Harper's Weekly should go flat. Send size of paper to be filed, and we will send an L. B. Case to fit it, and guarantee satisfaction.

Indexes cost extra, and are the price of the cases of the same size.

Discount of 20 per cent on five or more cases or indexes in one order.

48p. Card Index. A thick (6½ cm.) p L. B. box, filled with 200 No. 331 cards and an alphabetical index. Often used for the references on a single topic or in working over matter away from regular outfit, and for a small beginning of an individual card catalog. Box, cards, and index cost 75c.

48x. Regents Files. Since the use of cabinet files began, the high prices made necessary by complicated and expensive fittings and the cost of maintaining patents on various details have largely barred all but wealthy commercial houses from the advantages the system

gives of easy, rapid, and accurate filing of papers. No satisfactory low-priced simple mechanism had been accomplished until these cabinets were devised.

The Regents Files are simple, are without patent, and involve only a maker's profit. We unhesitatingly urge them for all filing purposes, as equal in convenience to any of the high-priced cabinets, at one third the cost of patented forms, while their interchangeable features admit of combining with other labor-saving devices.

The system brings together the mechanism for filing letters and pamphlets, for classing papers and current work (keeping in convenient form for reference and free from dust and "mussing"), and the card index now being so rapidly adopted as an index rerum.

48x1. Filing Box.

This is the single "L" file, of the thickness to hold easily in the left hand while handling the contents with the other. Size, 9 x 11 x 3¼ in. Handsomely finished. Each file has bronze label holder for framing the label marking its

contents, and a stout manilla index. Box and index cost \$1.00. Box only, 75c.

48x2. Note Filing Box. This is ½ the width of 48x1. Suited to filing standard note sheets flat, or "L" with one fold. Complete with index and label-holder. Price, 85c. Box only, 65c.

48x3. Classing Box. This is ½ the thickness of 48x1, otherwise same size. Too thin for use as a file, but a most convenient tray for papers. Price, 75c. each.

48x4. Note Classing Box. Same as 48x3, only ½ the width. Price, 60c.

Card Index. These are wood trays, matching cabinets, holding 700 331 cards, or the same value of other numbers, and the full complement of fittings. (See No. 22c6 outfits.) Each section of the file holds 2 outfits.

Price No. 22c6 outfit. Tray of handsomely finished oak, \$2.75 each.

Cabinets. These are handsomely finished in oak ; have panelled ends, and are upon casters, except the 5 size, which is made for use upon the table or elsewhere. They are the hight of a study table, for convenient consulting of the files, and, when the top is not used for that purpose, serve admirably for an ordinary table. The prices given below are for the outfits fitted with L files and indexes. Any variation or combination will be furnished based on the prices of single parts ; e. g. 10 thin trays without indexes, in a 5-section cabinet, cost \$12.75.

48 x 5.
Regents 5-File Cabinet gives capacity for 2,000 letters, when filled with 5 L thick file boxes. Price with one combination index, a to z, in 125 subdivisions, \$10.00.

48 x 6. **Regents 12-File Cabinet.** Fitted with 1 10-section and 1 2-section combination index, \$20.00.

For transfer cases we recommend our 48g box. See page 99.
Larger sizes manufactured to order.

Checking Paper. An L sheet ruled into cm squares, giving 500 spaces to each side of the sheet for statistics, tabulations, etc. Every fifth cross and down line is a heavy red one, marking the sheet off into 5 cm squares. All sheets are punched. Price per 100, 50c.

L. B. Ruling. The standard ruling for correspondence in L size papers is lines 1 cm apart. This "L. B." ruling has the same main cross lines, and faint intermediate lines between the regular rulings, giving one half cm cross, for interlining, shorthand work, or closely written matter. It also has faint down lines, dividing the page into four columns for headings or tabulations. The faint rulings can be written over without affecting legibility.

Made in L and N sizes, punched for the standard binder or for lacing. Price per 100 sheets, N size, 30c; L size, 50c.

Discount of 10 per cent on 1,000 or more in one order.

Blocks or Pads. We have made for us at the mill a series of standard sized papers of ordinary grade, blocked. Of good writing surface and of ample quality for notes and memoranda; chiefly, they are cut and blocked into exact sizes. All are put up in double thick pads, to avoid paying for straw board instead of paper. Uniform in quality and always of standard size, they will be found far more satisfactory than the irregular sizes, varying weights and grades, of odds and ends of paper usually put up in this way.

55a. King's Patented Nonpareil Pens. The question of selecting a satisfactory steel pen involves the peculiarities of the individual's handwriting to such an extent, that it is impossible to recommend any particular pen for universal use. In our large use of the King's among librarians, we have found them giving excellent satisfaction. While we shall be pleased to supply any of the hundreds of other patterns of other makers at the lowest price, we can conscientiously commend these as possessing all the qualities of a good pen.

Samples of the entire list below will be mailed to any address subject to approval on receipt of 6c. in stamps, or one gross on receipt of price. Price, \$1.00 per gross.

All orders should be sent to Library Bureau.

"Nonpareil" Extra Fine. WHITE.

Very fine and elastic. Superior for Professional Penmen, Ladies' use, and for hair lines and heavy shading.

"Nonpareil" No. 3. BLACK.

Point curved downward, and stiff.

"Nonpareil" Office. WHITE.

Medium fine. Easy writer. Superior to all others for Banks, Colleges, Schools, and Mercantile use.

"Beacon" Pen.

Similar to the Office, but having greater elasticity. An exceedingly easy writer.

"Nonpareil" Stub. BLACK.

Broad point; very smooth; easy writer. Especially adapted for Lawyers and back-hand writers.

"Nonpareil" No. 5. WHITE.

A fine Stub with short nib. A very pleasing pen for fine engraving.

"Nonpareil" No. 9. WHITE.

Long nib, fine stub point, free and easy writer.

"Nonpareil" No. 7. BLACK.

Medium fine, turned-up point. An easy writer for addressing.

"Nonpareil" Bank. WHITE.

A good business pen; large and long points.

"Nonpareil" Court. BLACK.

Turned-up point, smooth and easy writer. Particularly adapted for all rapid writing, addressing wrappers, etc.

"Nonpareil" No. 8. BLACK.

Same as above, except in point. A very firm, smooth and easy writer.

50 CENTS PER GROSS.

King's "Falcon" Pen. WHITE.

The standard popular business pen, used largely by Railroad and Express offices.

"I furnish my staff of 30 any pens they prefer. We have tried over 50. More Nonpareils are now called for than of all other makes."

MELVIL DEWEY, Columbia College Library.

HINMAN'S BUSINESS COLLEGE.

Worcester, Feb. 9th, '86.

Dear Sirs:—Your "Nonpareil" Office Pen is one of the best for business writing that I have ever used. During twenty years as a professional penman I have been very particular in the choice of pens, and I regard your "Nonpareil" as meriting special praise.

Yours truly,

A. H. HINMAN.

56. Higgins' drawing board mucilage. This is a vegetable glue and warranted to keep perfectly good and to contain no injurious ingredients. It possesses great strength and is recommended for sticking almost everything. Put up in screw capped jars.

Price, 3 oz., 15c.; 6 oz., 25c.; 14 oz., 50c.; $\frac{1}{2}$ gallon, \$2.00; gallon, \$3.50.

We also furnish Higgins' Photo Mounter, which is made especially for mounting photographs, drawings, etc. Put up as above.

57. Rubber Bands. As indispensable to the desk outfit as pens or pins. The L. B. Bands are put up by weight, in strong and convenient boxes of $\frac{1}{4}$ lb., or in bulk. Price per lb. in $\frac{1}{4}$ lb. boxes or blk., \$2.50.

58. Patent Spring Clasps. In reality tiny but strong spring clips. Can be used over and over again, are nearly as cheap as common pins, and largely supersede pins, staples, paper fasteners, rubber bands, clips, and all devices for fastening papers or cards together, either temporarily or permanently. No machine is needed to apply them, as for most paper fasteners or staples. They strengthen, instead of weakening the papers; and as a binder for newspapers they allow opening of every sheet flat, a material advantage over other devices. Chiefly, the Clasps are the only paper fasteners that file, bind, or fasten papers together securely without injury or mutilation. For librarians these are specially valuable for keeping together cards, order slips, etc., pertaining to the same book in the catalog department, and at the delivery desk for keeping together call slips, delinquent notices, etc.; also for attaching firmly to the book, without leaving the slightest trace after removal, cards, slips, notices, etc. Trial will insure their being kept constantly on hand. Sample cards of 100 sent postpaid for 25c. Price, \$1.50 per 1,000.

58u. Utility paper clip. For keeping papers together without puncturing or mutilating them. It is flat and especially good for papers to be filed among other papers, or for cards in card indexes.

Price, 25c. per box of 100.

58c. Bank Pins. Every one who handles many papers finds use for pins, regardless of the various other indispensable paper fasteners. The L. B. pins have sharp points, and will not bend readily. Price: ½-lb. boxes; per lb.: ⅝ in., \$1.40; ¾ in., \$1.20; 1 in., \$1.00; 1¼ in., .90; 1½ in., .90; 1¾ in., .75.

The 1 in. and 1¼ in. are sold stacked in pyramids, a very convenient form for desk use. Price, 10c. per pyramid

61a-b. Paper Shears. These are an essential part of a complete desk equipment. Best quality shears, of best proportions for cutting paper, are often found with difficulty, if at all. We have selected our list with great care. The longer patterns are specially recommended. They are so light and slender that they handle as easily as scissors; so excellent in quality that they cut as well as heavy shears. The pocket scissors are nickel plated, and have blunt, round points so they can be carried in the vest pocket with perfect safety.

PRICES

61a.	20	cm (8 in.),	.	.	.	\$.80	61b.	10	cm (4 in.) scissor,	.	\$.30
	25	" (10 "),	.	.	.	1.25		10	cm, best made,	.	.60
	30	" (12 "),	.	.	.	1.60		10	cm, folding, in case,	.	.75
	37.5	" (15 "),	.	.	.	2.40		12	cm, " "	.	1.00

The folding scissors have a handsome morocco pocket case free with each pair. 61a are japanned handles. Nickeled handles 25 cents extra.

61p. "Conductors'" Punches. For punching papers for tying or to make them bind nicely in some of the various binders. Special punches are often made, i. e. an initial of a person's name, and used to indelibly mark approval or check bills and other papers, sometimes as a safety device on checks, etc. For these and other uses it has been found a convenient desk tool. Our regular pattern cuts a round hole of 4 mm. diameter. Any other form made promptly at small extra cost, according to the form of die.

These are small die cutters, not the ordinary shoe punch, which is worthless for cutting paper. They are the only form sure to cut cleanly and easily. Price, \$2.50 each.

62c. Copying Press B. Many libraries and individuals do not have sufficient use to justify the expenditure for a Bailey Machine. We offer this press as a practical form, strong, well finished, yet low priced.

PRICES B. COPYING PRESS

62c1.	Plate 25 x 30 cm	(10 x 12 in.)	.	.	\$4.50
62c2.	" 25 x 38 cm	(10 x 15 in.)	.	.	5.75
62c3	" 27½ x 40 cm	(11 x 16 in.)	.	.	8.50

Circular of other styles on application.

62s1. Press Stand. A finely finished cabinet in cherry, walnut, or oak, natural or antique. The top is 50 x 60 cm (20 x 24 in.). A slide full size can be drawn out on either side and the cabinet has four drawers, or as shown in cut, or with one drawer and closet below it.

Price, No. 62s1, \$13.00.

63a. Brush Erasers. The little brush is a most convenient attachment to the rubber eraser for cleaning the page after erasing. The temptation is to dust off the particles with the fingers, which, when moist, may soil and leave marks not so easily erased; this is an exceedingly convenient little device. The rubber is of the best quality, and the brush strongly inserted. Price, 25c. each.

63c. Type Writer Eraser. Of circular form, especially designed for use on paper while in a ma-

chine. It is equally good for erasing pencil marks or smoothing the surface of paper upon which the steel eraser has been used. Price, 5c. each.

63e. Steel Eraser. An essential tool for every cataloger's desk. Those offered by the L. B. are of the highest grade steel. Made in 2 forms—oval and with knife edge for use as paper cutter, all with cocoa handles. Price, 63e1, oval, 40c.; 63e2, knife edge, 50c.

64d. L. B. Desk Pads. Protect the desk from ink stains, and serve as a blotter and cushion for writing upon. Three sheets of blotting held by four russia corners and heavy tar board back. An essential on every desk. Made in 3 sizes, and filled with the best "Treasury" blotting. Price, 19 x 24 in., \$1.00; 12 x 19 in., .75; 9½ x 12 in., .50.

Vertical Section.

66s. Sponge Cup. In counting money, sealing, and stamping postage on letters, or as pen cleaner, and in many other ways, this is a needed desk appliance. Their peculiar form protects from evaporation. Price, 40c. each.

66a-b. Perfect Inkstand. CUT GLASS, STEEL, AND PURE RUBBER.

Cut of 66a.

Cut of 66b.

DESCRIPTION: A pouch of pure soft rubber holds the ink, an ebony cut-glass base protecting it from accident. A steel saucer is connected with the nicked thumb-screw on top, which compresses the fountain and sends up exactly the amount of ink wanted. On top a cube of crystal cut-glass forms the dipping cup for the pen. An air-tight rubber stopper completes this "instrument of precision," as it is justly called.

The two essentials of a perfect inkstand are a *pen gage dipping cup* and *adjustable fountain*. Our stands have both essentials, and are made on scientific principles. We offer them with privilege of return if not satisfactory in every respect, after a month's trial. They soon save their cost by preserving both quantity and quality of the ink and the points of pens from any possible injury. Price 66a, pressed glass, \$1.50; 66b, cut glass, \$2.00.

place. Nickel 50c. Japanned 25c.

64. Combination Weight and Paper Clip.

A handsome, highly polished, nickeled paper weight, which is also an admirable clip. Papers are firmly clamped between the base and the adjustable weight, which is held in place by a strong spring that is easily moved with one hand, as shown in the cut. It works equally well for one or 100 sheets of paper. Handy, ornamental, durable, and always in

69e. Ventilated Eye Shade.

The most comfortable, durable, lightest, coolest, best. A row of holes round the rim nearest the forehead allows a circulation of air and prevents overheating the eyes. A flexible brass spring runs round the outer edge, keeping it in shape. It can be easily bent, so as to give the proper hold on the head, or it can be changed at any time to suit the wearer. Price 15c. each, or mailed, postpaid, for 20c.

69g. Glass Pen Cleaner.

Simple, quick, convenient. No machinery to get out of order. Takes little room on the desk. Always ready when wanted. Stiff brushes are firmly fastened inside a glass cup, which is protected and made stable by an iron base. When the cup is filled with water, the pen can be thoroughly cleaned with a single motion of the hand, and without the danger of injury incurred by use of rags, chamois-skin, shot, etc. No one who has tried this patent cleaner will again use the old-fashioned devices. It saves its cost, in lengthening the life of steel pens, which corrode rather than wear out. Price 25c. each.

69p. Perfect Pencil Sharpener.

Saves soiled fingers, and much time where lead pencils are used to any extent. We have selected this from all the candidates for favor as the best. Simple in construction and working, and costs nothing to maintain. Price, \$1.00.

Address all orders to Library Bureau.

73. Danner Revolving Bookcases. Since the introduction of these celebrated cases we have sent thousands of them throughout the United States and abroad, and in every instance they have given complete satisfaction. They are so constructed as to shelve books on all four sides, making a solid column, and holding more books than any other case made to occupy the same space; while a touch of the hand brings every book within reach of a person sitting beside the case. Their chief excellence is the convenience with which the contents can be consulted. Two cases behind a study chair are out of the way, but bring within instant reach of the hand 400 volumes of books, or their equivalent in other objects. No such labor-saving convenience has ever before been offered to students and literary workers.

The principle on which the cases are suspended makes them perfect, durable, and absolutely noiseless. There is nothing to get out of order. A committee of the American Library Association loaded one side of a 73j case with 180 lbs., the other sides being empty; and in this condition it was tested for two months, and revolved as perfectly after the experiment as before.

SPECIAL SIZES. While any variation in style or size can easily be made, only the patterns shown in this catalog are kept in stock. Special designs, to match other furniture, will of course take extra time, and cost more than the regular cases, which are made by the hundred and kept in stock. Variations in height of shelves seldom cost anything extra; but *change of diameter* adds to cost.

The L. B. pigeon-hole cases (No. 47 in this catalog) are made to fit the spaces of 73g-k.

The question is often asked if round cases are made so as to revolve in a smaller space than square ones with projecting corners. A little study of a diagram of a round case and a square one, will show that the square is the *only economical form for a revolving case*. In this way we get a solid column of books, and nothing more compact is possible.

As evidence of their great merits, thousands have been sold with the following privilege:—

“These cases will be sent to any responsible party with the *distinct understanding* that, if they do not perform as *represented* and to entire satisfaction, they may be returned.” NOT ONE CASE HAS BEEN RETURNED. No further proof is needed of the value of the invention, nor of the satisfaction which it uniformly gives to buyers.

All orders should be addressed to Library Bureau.

73a-b. Danner Revolving Bookcase. 16½ in. square, 33 in. high, holds 32 thick, Royal 8° volumes, size of American Cyclopædia, besides several larger volumes on top.

PRICES

73a. 2 sections, 33 in. high, as in cut, 68 in. of shelving, weight, packed, 50 lbs. **\$9.00**

73b. 3 sections, 43 in. high, 112 in. of shelving, weight, packed, 65 lbs. **11.00**

73c-d. Open Deck Danner Revolving Bookcase. 20 in. square, 42 and 54 in. high. Revolves in a circle 28½ in. in diameter.

The open deck gives an extra shelf for large books, atlases, music, unbound periodicals, etc., thus combining bookcase and book-rack.

One of the most attractive patterns made.

PRICES

73c. 2 sections high **\$14.00**

73d. 3 " " **16.00**

Address all orders to Library Bureau.

73e-g. Champion Danner Revolving Bookcase. No cases, except the 73i and 73j, have had so large a sale. Revolves in a smaller circle; fits into corners and spaces that cannot accommodate the larger; while slight changes in construction make a lower price possible. Each section has 1 meter (40 in.) of shelving. Case is 20 in. square, or same diameter as Open Deck. Walnut, oak or cherry at same price.

PRICES

73e.	2 sections high	\$12.00
73f.	3 " "	14.00
73g.	4 " "	16.00

73g2. Danner Revolving Bookcase. Same capacity and space occupied as 73e-g, but ornamented by a rope moulding at the top, and has an adjustable book rest on top. This rest is held at any angle by a self-acting ratchet, and furnishes an admirable holder for the dictionary, atlas, or other reference books. This is one of the handsomest cases in the list. Made in antique oak, natural cherry, imitation mahogany, and walnut.

PRICES

73g2.	2 sections high	\$14.00
73g3.	3 " "	16.00

With brass rods in place of vertical wood strips, these are \$1.00 additional.

73c-3. Open Deck Danner Revolving Bookcase. More elaborate finish than 73c, but same form and size. A very handsome case; has rope moulding at the top and base, and carved corners. The finest finish and most elaborate pattern made.

PRICE

73c-3. 2 sections, and book-shelf . . . **\$18.00**

73h-k. Standard Danner Revolving Bookcases. The most widely used pattern, costing less in proportion to capacity than any other case. 24 in. square; each section has 56 in. of shelving. The bottom section is 12, the others 10 in. high. Made in antique oak, natural cherry, and walnut.

73h.	2 sections high,	112 inches shelving	.	\$16.00
73i.	3 " "	168 " "	.	18.00
73j.	4 " "	224 " "	.	20.00
73k.	5 " "	280 " "	.	22.00

73k6. This is an extra large case, of the same general style as the Standard. It has 5 tiers or sections ; is 30 in. square, and 5 ft. 9 in. high ; the shelves are 8½ in. wide, and 21 in. long. The lower section is 12 in. high ; all sections above, 10½ in. high, the whole case gives 35 ft. of shelving. Made in antique oak, imitation mahogany, and walnut. Price **\$27.00**

Sargent Rotary Bookcases. The claim for these is that the rotary movement being obtained at the bottom of the case, there is no upright to warp and throw out of plumb, and thus revolve unevenly. The cut shows the ball-bearing turn-table which carries the weight, these balls being connected by rotary axes. These cases are very finely finished, made of carefully selected stock, and avoid the somewhat ungraceful feet of the Danner, the rotary table being a finished piece of work not incongruous with the case. Special cat-

alog on application. Cases are finished in antique oak, walnut and birch, finished in imitation of mahogany.

73s2. Rotary Bookcase.

Has four shelves, 17½ in. long, giving 5 feet 8 in. of shelving. These are the depth and height to accommodate books of the size of the "Encyclopedia Britannica." Absolutely no waste of space.

Size, 17½ in. square; height, 31 in.; shelves for two tiers of books on each side; size of shelves, 17 in. long by 8¼ in. deep; height of sections: lower, 11¾ in.; upper, 11 in.

PRICE

73s2. Rotary Bookcase . . .	\$10.00
With adjustable shelf, shown on following page . . .	13.50

73s3. Rotary Bookcase. Same as 73s2, except one section taller. Hight of case, 43 in.; total shelving space, 8 ft. 6 in. This is the most satisfactory low-priced pattern.

PRICE

73s3. Rotary Bookcase . **\$12.50**
With adjustable shelf . . . **16.00**

Adjustable Shelf Attachment. May be applied to all 77s cases. The shelf is adjustable to any angle, and forms a reading easel, writing desk, or level extension of the bookcase top. It is so arranged as not to interfere with the removal of the books from the shelves. This shelf is furnished for any case at an additional cost of \$3.50.

Price,	\$22.00
With adjustable shelf,	25.50

73s9. Rotary Bookcase. Constructed to accommodate the six volumes of the "Century Dictionary" — one on each of the shelves between the panels on the sides. All the other shelves are adjustable. Very handsome in design and finish.

Size, 24 x 24 in. ; hight, 53 in. ; hight from lower shelf to under side of top, 43 in. ; length of shelves, 20½ in. ; depth, 9 in. ; width of "Century Dictionary" shelves, 3¼ in. ; hight, 13¾ in.

73s9. Rotary Bookcase,		\$30.00
With adjustable shelf,		33.50

L. B. Reading-Room Tables. We recommend these as the best, strongest, and most satisfactory standard patterns for reading-rooms and libraries. All the details have been most carefully studied to obtain a maximum of utility at a minimum of expense. While we have every facility for making any design or variation to order, we commend these as meeting all requirements, and to be had at less expense, and without the delay of making to order. The regular tables are fitted with slides on either side, nearly doubling the available space, when needed. For the reader this added space is much more convenient at his side than in front. The "L. B." has been found the most convenient size; certainly, no larger can be recommended. They seat four easily and can accommodate six. We strongly urge tables not larger than those on our list.

Many libraries make the mistake of having one or two large tables for their reading-room in place of six or eight small ones. This plan may mean pleasure for a large family or economy for a boarding-house, but is not wise for the library. The student will rarely enjoy his studies with his work inspected by the curious, or his attention distracted by others in close proximity.

Small tables, too, can be arranged to suit convenience of space, and will accommodate more people for the space occupied than the same surface in a large one. The slightly added expense is more than compensated for by the gain in convenience and comfort to readers.

75m. Price: size 160 x 90 x 80 cm. (60 x 36 x 32 in.) . . . \$20.00

75n. Same without slides 15.00

Ten or more in one order at a discount.

75o-p. L. B. Reading-Room Tables. These were designed by a leading New York architect for Columbia College Library, New York, and have been adopted by many others. They present a somewhat massive appearance, are very strongly built, and are guaranteed not to warp or split.

75o. Price: size 150x100x80 cm. (60x40x32 in.) **\$25.00.**

75p. Same without slides, **\$20.00.**

75q-r. L. B. Reading-Room Tables. Recently designed by the Bureau for the Mercantile Library, New York. An exceedingly graceful table; so constructed as to do without the stretchers of 75o with safety.

75q. Price: size 160x90x80 cm. (60x36x32 in.) **\$25.00.**

75r. Same without slides, **\$20.00.**

Special price for large number of tables in one order.

76a. L. B. Study Table. Most library tables have interior fittings suited only to commercial uses. The L. B. is made solely for literary workers, giving widely different details, that increase its value tenfold in use. It is of the best material, workmanship, finish, pattern, and size of the best and most widely selling library table made. It is larger; drawers run back farther, giving one fourth extra capacity; it has reversible slides, which double the surface of the table-top when wanted, without taking any room. The height, width, and depth of drawers, position and size of compartments, and every detail of construction have been carefully studied, and the result is the most useful library table made. The chief feature is the adjustable partitions, which enable one, without tools, to make compartments running either way of any of the nine drawers, firm, strong, and of various sizes. The two upper drawers, on each side, fit No. 33 catalog cards, postal cards, and No. 5 envelopes on edge. The third, billet size, bank envelopes, and commercial note paper, and the bottom drawers take on edge all ordinary pamphlets. The center drawer has separate boxes for all denominations of p. o. stamps, rubber bands, pins, and all the little losables about a desk, with compartments for letter sheets, flatwise.

All drawers self-locking. Size of table, 135 x 75 cm (54 x 30 in.); height, 80 cm (31½ in.). Price, in oak, polished wood top, \$32.50. Any other wood to order.

76b. L. B. Study Table. Five drawer. Similar to 76a in arrangement, and of the same superior workmanship and finish. Size, 120 x 75 cm (48 x 30 in.). Price, 76b, polished wood top, \$27.00.

77. Library, Study, and Reading-Room Chairs. The styles below, selected from a great variety of patterns, most completely meet the needs of libraries. Personal comfort, while sitting at a desk or reading-table, depends in large measure on the chair. The best styles for desk or table have low braces instead of arms, as this construction allows the chair to be brought nearer the desk, also to be slid under it when not occupied. Swivel chairs are adjustable to any height by revolving, and save carpets, floor, and strength, because the twisting motion, in drawing up to the desk or leaving it, is transferred from the feet and floor to the pivot screw. Spring chairs rock on heavy springs, allowing one to adjust the slope of the seat or to gratify the common inclination to tilt back or rock.

All swivel and spring chairs are furnished with patent double casters, without extra charge.

In public reading-rooms, chairs with four legs, like the dining-room chair, are generally used, chiefly because less expensive than those with swivel and spring. For this purpose No. 77a, and the bent wood chairs are the favorites. Special catalog sent on application.

Oak, walnut, cherry, or ash.

77a. Full Arm Reading - Chair.

With full length arm and seat, making it very roomy and comfortable, and specially adapted to libraries and fine offices. Walnut, cherry, ash, or oak. For reading-rooms, where a large, substantial chair is wanted, at low price, this chair, with straight legs, which does not revolve or tilt, is usually adopted.

PRICES

77a1. Finely upholstered in leather, patent casters . \$18.00

77a2. Cane seat, 10.00

77a4. Cane seat, dining chair . 4.50

77b. Full Arm Reading-Chair. A cheaper chair than 77a4, but possessing all the requirements of a strong, comfortable, and handsome chair at a reasonable price. It is made with saddle-seat, rounding and slightly sloping back. Being made of solid wood throughout, and thoroughly built, it will be found one of the most durable chairs that can be obtained. Made in oak and imitation mahogany. Price, \$2.00 each; special discounts will be made on large orders. See cut on next page.

Bent Wood Chairs. For all purposes, the following light, strong, and handsome chairs are rapidly growing in favor, perhaps nowhere more than in reading-rooms and libraries. So light, a child handles them easily; so strong, they are never broken. They are almost noiseless,—with the patent L. B. rubber tips inserted, absolutely so,—a very important consideration. Handsomer and more durable than the heavy, clumsy patterns often made from architects' designs at large expense "to match;" these match any forms readily. Among the prominent libraries using them are the Pratt Institute, Brooklyn, N. Y.; Osterhout

77b.

Free Lib., Wilkes Barre, Pa.; P. L., Quincy, Ill.; P. L., Salem, Mass.; Howard Memorial Lib., New Orleans; Belfast Free Lib., Belfast, Me.; Passaic Library and Reading-room, Passaic, N. J.; P. L., Melrose, Mass., and many others. We most cordially commend them as the best reading-room chairs: Oak, and imitation mahogany, or walnut. Special terms will be made on large quantities.

78n. Newspaper rack. A new device for holding files of current newspapers in the most compact way, yet having each paper

partially exposed to view for identification.

The problem of filing papers in the least space, consistent with ease of selecting the one wanted without handling the others, has never till now been satisfactorily solved. Our new rack is the solution.

It is a frame of oak, handsomely finished, with slanting sides fitted with specially designed solid bronze hooks sufficient for twenty files. The hooks are arranged one above another so the file sticks resting on them leave about six inches of each paper visible, except

the lowest ones, which are wholly exposed. Made to order in walnut, cherry or mahogany.

Regular sizes 28 and 34 inches. Other sizes made to order.

Price	\$15.00
Walnut and cherry, additional	2.00
In mahogany, additional	3.00
Oak, cheaper finish electroplate hooks	12.00

78p. Periodical rack. For holding current magazines. It is made of oak, with slanting sides, so as to form a series of pockets like a ticket case, in which the magazines rest one row above another. Its advantages are obvious. It takes one third the floor space of tables. It costs less. The magazines cannot be knocked off by careless handling. Each one is sufficiently exposed to enable the reader to find the one wanted without touching others. As desirable for hotels and news-rooms as for libraries. These can be made to order in walnut, cherry, or mahogany, or in two-sided form.

Price	\$18.00
Walnut and cherry, additional	2.00
In mahogany, additional	4.00

79a. Folding Steps. One often has to deal with shelving already built beyond reach. The ordinary step-ladder is forever in the way, and causes falls and minor injuries. Something of the kind is necessary, often up to 90 cm. The best patterns which we have been able to devise or find are the Folding Library Steps, given below.

OPEN.

HIGHT		PRICE	
60 cm	24 in.	-	\$3.50
70 "	28 "	-	3.75
80 "	32 "	-	4.00
90 "	36 "	-	4.50

CLOSED.

The steps are folded in at a touch, making a strong stool, take little space, useful for a seat or table, and can be easily carried.

81m. Mimeograph. Libraries find many uses for a good duplicating process in printing lists of duplicates, notices, bulletins, and brief finding lists. Beside saving in printers' bills, it gives matter an autographic character not obtainable from type.

The Edison Mimeograph reproduces autographic writing, sketches of all kinds, architectural drawings, music, etc., in almost unlimited numbers from an original, which is made by the operator as easily as one would write or sketch with a lead pencil. Beside this, its use has been extended to cover ordinary typewriter work. A stencil once prepared, 1,200 to 1,500 copies can be taken.

Each outfit is complete with one quire of stencil paper, one tube of black ink, stylus, blotters, etc., and is packed in a handsome hardwood case.

PRICE LIST

81m0.	With Writing Plate	1½ in. wide, for paper	6 x 8 in.	. . .	\$12.00

DICTIONARY HOLDERS

These ingenious devices have been before the public only a few years, but are found to answer so universal a want that they are now considered an indispensable accompaniment to a dictionary. A dictionary without a holder is a hidden treasure. The dictionary, to be of service, must be used; to be used it must be at hand when wanted, and to be at hand when wanted it must be in a holder ready for reference. Children and grown people use a dictionary if it is in a holder, when they would not go to a bookcase for it. The holder is worth its cost for the preservation it affords. The great and costly book does not get racked, soiled, spoiled, or used as a footstool. Open it, and it remains open; close it, and it remains closed. If at your side when reading, the task of looking up new words is not deferred and then forgotten, but done instantly and easily. A thousand dictionaries in out-of-the-way places do not instruct, while a single dictionary mounted in a holder might serve thousands. In fact, the holder is the great helper of the great lexicons, and in making these stores of learning available is second in importance only to the lexicons themselves.

86c. Century dictionary stand.

A handsome stand of polished oak, made with 7 shelves, one for each volume of the Century Dictionary. Each shelf is fitted with 5 patent brass rollers, on which the book rests. These allow the heavy volumes to be removed without wear to leather or cloth binding. The stand is made with sloping top on which to rest the volume during consultation.

Price in oak, **\$15.00.**

Other woods to order.

**86d2.**

Dictionary Holder, with Casters.

Price, \$5.00.

**86d3.**

With Side Shelf.

Price, \$6.50.

86d5.

With Central Revolving Shelf.
Price, \$6.75.

86d10. With self-adjusting movement. By opening at any point the heavier side of the book, by its own weight, adjusts itself to a lower plane than the lighter, and the pages always lie perfectly flat.

Japanned	\$5.00
Gold bronze finish	5.00
Nickel-plated throughout .	8.00

86e. Atlas Stand.

Made for holding an atlas or large folios when open, at any desired angle, and when closed, protects from injury and keeps the book in good form..

Oak, walnut, or cherry.

Price, \$7.00.

**86e2. Reading Stand.**

A combination of the Chair Reading Rest and revolving side shelf upon the tripod of an 86d1 Dictionary Holder. It gives adjustable height and angle, and on casters it can be slid about the room, alongside the chair or lounge, allowing a greater variety of positions to the user than is possible with the chair rest. Walnut, oak, or cherry. Price, \$7.00.

86f. Perfection Book Rest.
Adjustable to any incline. From the top of the rod, fastened to the chair arm, extends a jointed lever by means of which the position of the book can be arranged to suit the convenience of the reader.

The top can be used as a writing desk, and a drawer holds writing materials.

PRICES

86f1. Plain oak, walnut, or cherry, . . .	\$3.50
86f2. Billiard cloth top, .	4.00
86f3. Plain black walnut, with drawer, . . .	4.50
86f4. Billiard cloth top, with drawer, . . .	5.00

86h. Perfection Table Rest. Adjustable to any angle, and revolves at a touch. The base alone is a valuable supplement to 86f. Furnished in oak, walnut, or cherry.

PRICE

86h. Perfection Table Rest,	
Complete, . . .	\$2.00
Base only, . . .	.75

86k. Arm Rest. In writing on the bottom lines of the Accession Book or any account book the writer is compelled to have some support for the arm, or the handwriting becomes cramped and not uniform with the rest of the page. The L. B. Arm Rest overcomes this difficulty, and gives greater ease in writing.

Made, in oak, handsomely finished. Price, 75c.

86l. L. B. Ledger Rest. For holding on the desk, at any angle, large books of record or reference, like the heavy library accession book. An improvement on the form heretofore used

in banks and offices. When not in use it shuts flat, and can be stored between the books.

We make for "cap" books a small size, 40 x 44 cm (16 x 18 in.); for "medium" and "demy" books, 44 x 60 cm (18 x 24 in.); and one for large bank and insurance books, 50 x 75 cm (20 x 30 in.). Oak, walnut, and cherry in stock, and other woods made to order. The Rest saves the books as well as the writer, and is indispensable when once used. Our L. B. is at once handiest, folds more compactly, is handsomest, and for quality, the cheapest.

PRICES

8611.	40 x 44 cm. (16 x 18 in.)	.	.	.	\$3.00
8612.	44 x 60 " (18 x 24 in.)	.	.	.	3.50
8613.	50 x 75 " (20 x 30 in.)	.	.	.	4.00

88a. Hammond Card Cataloger. Preëminently the library typewriter, and the only one thus far invented that writes catalog cards perfectly. For general correspondence, as well as special library work, it gives speed, great perfection of work, ease of manipulation, and simplicity of mechanism. The great importance of having the card catalog written legibly and permanently, to be assured against the possibility of having to incur the great expense of re-writing faded cards, is a growing consideration. The Hammond does its work for all time, produces matter as easily read as printed cards, and gives absolute uniformity in the catalog. While libraries possessing old catalogs are adopting type-written cards, no library starting a new catalog can afford to do without it. Much used in writing shelf lists, intercalation being made with it so readily. We know of no library that has not found it a labor-saver, compensating for its cost many times over. The Hammond gives perfect alignment, absolutely uniform impression and rapidity, has interchangeable types, admits any width of paper, is light and portable. Sent on two weeks' trial, with privilege of return, to any library wishing to purchase.

The Library Bureau Hammond is fitted with special patented attachment for holding cards, and a wheel with the special characters needed in cataloging, as indicated by the Library School Card Catalog Rules, and the key board is correspondingly engraved. While we sell this special machine for library work, we can furnish machines without the technical type wheel if desired.

PRICES

Hammond card indexer (in mahogany, walnut, or oak case) \$100.00
Additional Type Shuttles, each 2.50

Copying Ribbons, black, purple, blue, green, or red, or Non-Copying Ribbons, on spools \$2.00 each. Without spools, \$1.00 less.

Black Record Ribbon is most used for cards.

89a. Novelty Paper Fastener.

For fastening legal papers, filing reports, memoranda, bills of lading, newspapers, etc., binding letters, papers, books, magazines, etc., posting cards, show cards, circulars, price currents, etc. One blow drives and clinches the staple. It does

the work perfectly of a high-priced machine. Besides its use as a paper fastener, it will be found a handy device for fastening tags to trunks, boxes, etc. Its uses about office or home are almost unlimited. It works equally well with paper, cloth, wood, rubber, etc., and so quickly and well as to be often preferred to glue, paste, pins, etc. It is a wonderful little invention, and its own merits have given it a marvelously large sale. Extra staples cost 30c. per 1,000 for $\frac{1}{8}$, $\frac{1}{4}$, $\frac{3}{8}$, or $\frac{1}{2}$ inch. Price, complete, driver, holder, clincher, 500 staples and 100 suspension rings, 50c. Extra suspension rings, 60c. per 1,000.

Interior Woodwork.

Having received so many requests for estimates on to order woodwork, the Library Bureau found it necessary some years ago to increase its cabinet-working plant for the purpose of manufacturing all kinds of interior woodwork and special furniture. This department of our business has increased so rapidly that we have made still further improvements and enlargements in our factories to accommodate this particular class of work. Having large interests in Chicago, we have established valuable western connections. We therefore have facilities for buying the finest grade of lumber at reasonable prices. We aim to turn out not only handsome but thorough work. Particular attention is paid to mechanical points of construction which for the sake of saving in original cost are so often ignored by ordinary furniture manufacturers. Many of these little details are not apparent at the start, but occasion great annoyance in after years if neglected.

Our many years of experience in meeting the wants of libraries enables us also to employ methods of construction which add greatly to convenience, and which do not increase expense. We have often, by suggesting slight changes in book and storage cases, which we have built, increased their usable capacity 20 per cent without increasing space occupied, and at no additional cost to our customers. Our experience enables us to construct library furniture which not only fills specifications, but in the best way answers the purposes for which it is intended.

We are pleased to figure from architects' drawings on bookcases, delivery counters, newspaper and periodical racks, wardrobes, tables, chairs; in short, every article of furniture which may be needed in fitting a library or reading-room.

Where it is desired, we cheerfully submit sketches from our own draughting department on any special piece of cabinet work. If we can be of assistance to those interested in the building of new libraries by suggesting economical and artistic arrangements of interior fittings, we gladly offer our services. We have in many instances, when we have had drawings of the building to work from, made special designs for the entire interior woodwork to harmonize with the architectural style of the building.

We solicit correspondence with architects having new libraries in hand, or with any who are interested in the building of new or fitting of old ones.

Alcove in Art Museum, Springfield, Mass.

L. B. Steel Stack

This is an entirely new invention based upon quite different principles from any other ever offered. Three distinct requisites for a perfect stack are : 1, to make each shelf absolutely adjustable ; 2, to obtain a construction which should furnish needed structural support for two-, three-, or even four-storied stacks, and at the same time present a compact, graceful appearance, for a single hight so often required in the reference or reading room ; 3, to give the least possible obstruction to light and air. After years of study and experiment this has been accomplished.

The shelves are held in place by brackets sliding in the grooves of the uprights, which in their turn are held by a simple device, instantly and easily adjustable. Absolute adjustability is the chief feature of the stack possessed by none other.

The slight advantage gained on each shelf by the exact adjustment frequently enables another shelf to be placed in the stack, increasing the capacity of the library from 10 to 15 per cent. Such saving should be considered in the cost of the stack. The shelves are readily adjusted when loaded with books.

The stack, unlike many others, presents no rough surfaces to the books, and is constructed so that it is impossible for the shelves to tip downward, however great the weight placed on the front. Every detail has been carefully studied to secure the best possible results, and represents not only our experience but that of many libraries.

Libraries sometimes make the mistake of having too wide as well as too long shelves ; some stacks having been built with all shelving twelve inches wide. Eight inches is ample for all except large books, of which the number is comparatively small in any library. This extra width beyond the eight inches is worse than lost, for besides losing much from the aisle space between the stacks, which may mean the loss of several stacks in a large room, it furnishes a place at the back of the shelf for the dust to collect and the books to become hidden.

We recommend that the shelves be of wood, though the rest of the stack is constructed of iron and steel ; they are lighter and more easily handled, are pleasanter to the touch and less wearing on the books, they occupy no more space, cost less, and are more ornamental. It is a fallacy that there is protection from fire in steel shelves, which is the only argument claimed for them. Steel shelves would in no case prevent fire, and a fire once started in a building, they are a menace, since steel is a conductor of heat and warps under its influence. A stronger argument could be made for printing and binding books in asbestos.

Instances have come under our notice where books have been saved by being on wooden shelves. Again, steel shelves, whatever their finish, are liable through abrasion to rust, and thus present a rough surface to the edges of books. Still more important, they collect moisture in warm, damp weather, which wood does not.

While we argue against using other than wood shelves, we supply steel when desired.

Although the L. B. stack is a recent invention (1894), it has been adopted by the following libraries:—

Howard Whittemore Memorial Library, Naugatuck, Conn.; Warder Free Library, Springfield, Ohio; Ohio State University, Columbus, Ohio; University of the State of North Carolina, Chapel Hill, N. C.; Cossitt Library, Memphis, Tenn.; McGill College Library, Montreal, Canada; U. S. Dep't of Agriculture, Washington, D.C.; Gail Borden Library, Elgin, Ill.; Jackson Public Library, Jackson, Mich.; Imperial Building Co., St. Louis, Mo.; Bristol County Court House, Taunton, Mass.; Free Public Library, Newark, N. J.; Brockton Free Library, Brockton, Mass.; Fort Wayne Public Library, Fort Wayne, Ind.; Springfield City Library, Springfield, Mass.; Pratt Institute, Brooklyn, N. Y.; Harvard College Library, Cambridge, Mass.; Indiana State Library, Indianapolis, Ind.; University Library, Lincoln, Neb.; Princeton University Library, Princeton, N. J., and others.

Correspondence is solicited with any library or architect considering new shelving. The L. B. stack has been constructed to give the most perfect details at reasonable prices. Comparison of cost with wooden cases will be found favorable when durability is considered.

Designs and estimates for any shelving that involves the use of the L. B. patents will be furnished upon application. No library should decide upon any form without considering this, recently pronounced by leading librarians the best yet devised.

Manufactured and controlled solely by the **Library Bureau**, Boston, New York, Chicago, Philadelphia, Washington, D.C., St. Louis, London, and Paris.

The cut on the opposite page shows the general arrangement of the L. B. stack. We find that alternate stacks with ledges save floor space and the three tiers of wide shelves on each alternate stack furnish ample space for larger books. This gives for each aisle a ledge for handling volumes.

The floors in a two or more storied stack are usually of perforated iron, but glass flooring can be furnished if desired.
